User Manual

Kverneland Group Website
Version 2.1-2014

kverneland group

Introduction

Our web sites play an important part in the Kverneland Group marketing mix. Our ambition is to present ourselves as a dynamic and innovative company on the web with an attractive product offering. We want the web sites to be sales and campaign driven, with strong focus on news, activities and competent product information.

Future success of our web sites is very dependent on content management, and that we manage to keep our web sites alive and up-to-date. To ensure this we must all actively contribute with content, activities and stories, in order to ensure a strong and attractive presence on the web.

We want an open approach, high involvement and input from all entities involved in our web sites. Therefore, if you have open issues or questions, please contact Group Marketing for support.

This User Manual serves as a practical tool in supporting you as a local publisher, in your daily work on the web sites. It should be regarded as a working document, and if you have comments, suggestions for improvements or miss elements please do not hesitate to report this back to us. In this way we ensure that the User Manual is always up-to-date.

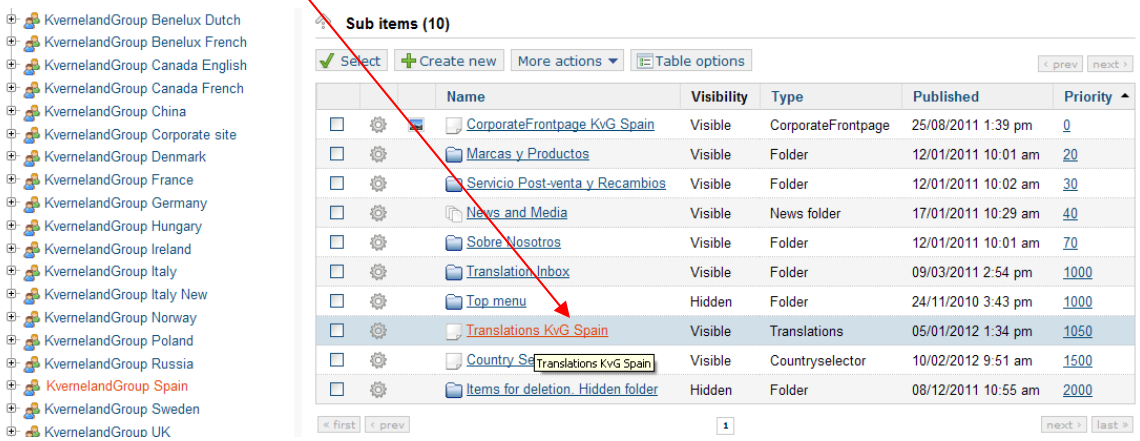
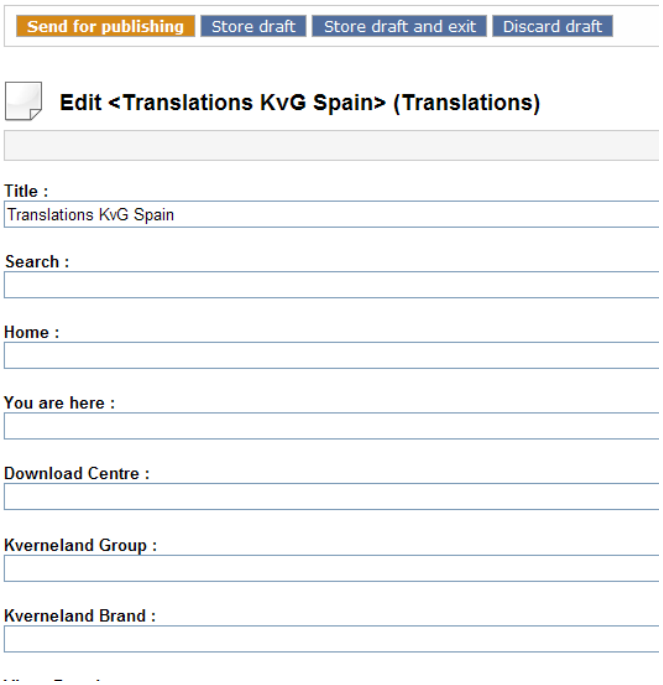
Translations form.

How to change fixed words on the site

Folders and documents are translated by simply changing their name. Some of the words on the web site like “View all” and “Home” can only be translated in the form called “Translations xy…”. You will find it in the admin area (admin.kvernelandgroup.com) when you click on your site, like you see below. Each site has one; you don’t have to create it.
In this form you find all the words that can be translated into you your language. Type the words in the text area and click on “Send for publishing”.



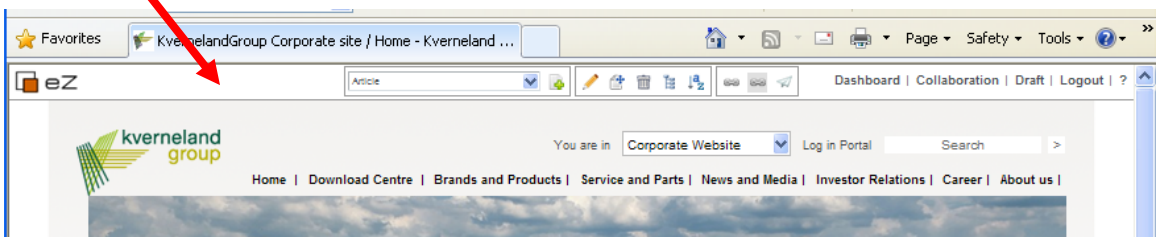


Articles

Make an Article or change the text for an Article

Please log into the web site you are going to make changes to
xy.kvernelandgroup.com

This toolbar shows when you are logged in:



To make a new Article, choose the correct Folder for the Article. Normally "Article" shows in the dropdown list, click on this icon (Create here) and fill in the form. Same procedure as for "Changing text in an Article" described below in the following pages.

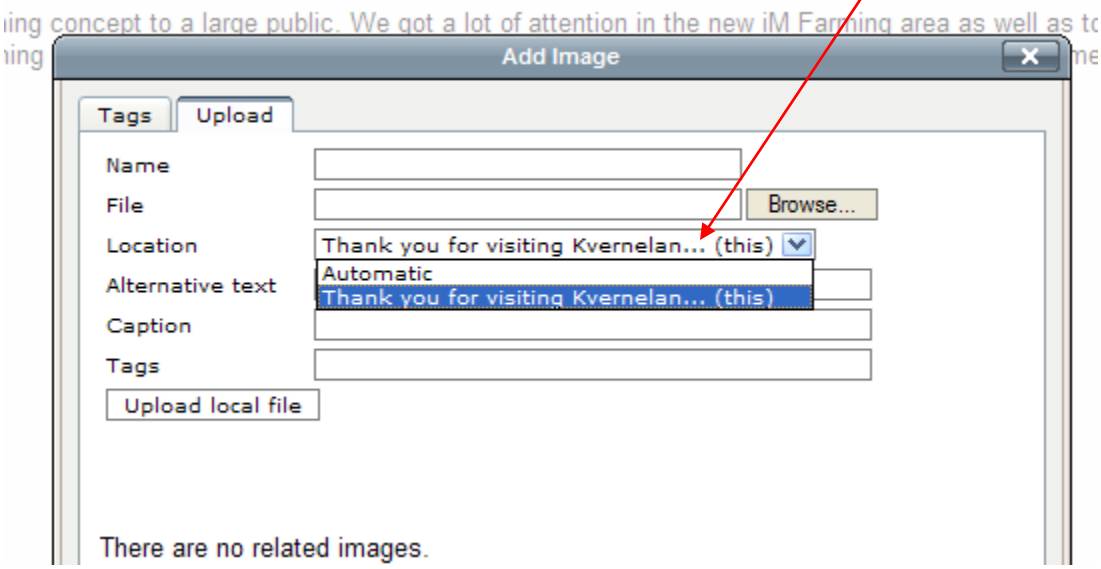
Upload images in a new article.

The new Article must always be published before uploading an image. The image has to be uploaded in that article, and for this you have to choose (in Location) the new article name and not Automatic. Here is how it looks when the article is published; you will see the article name with the word "(this)" behind:
(Please look at "Uploading Images" for detailed description for uploading images)



Making tables

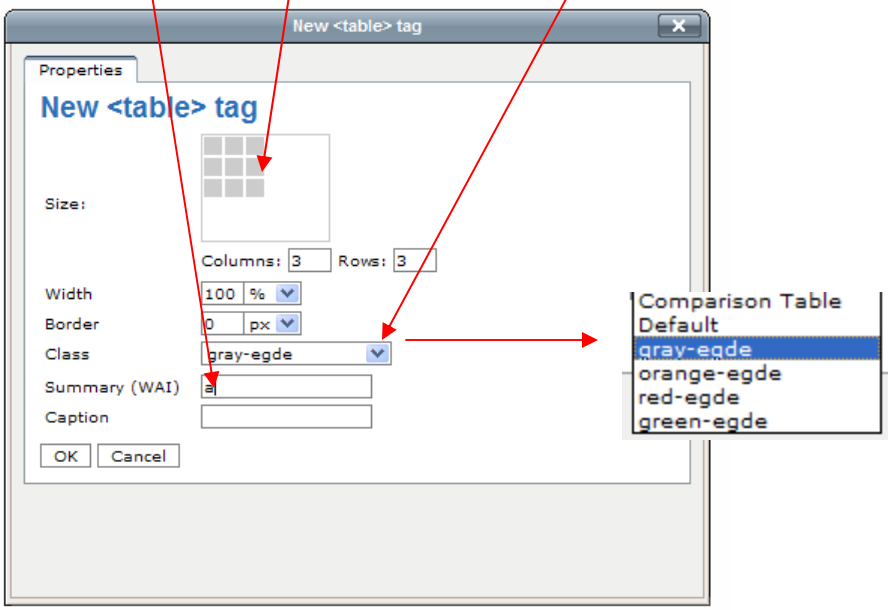
- Click on this icon  on the toolbar…

…and you will get a new window
In text fields for the **Technical Specifications**, tables can now have a pre-defined look. Follow the description here:

Make your choice for:

- how many columns and rows you are going to have
- in the box “Class”, choose one of the tables (IMPORTANT!)
- always write a letter or a number in the box “Summary” (anything)

Click OK.

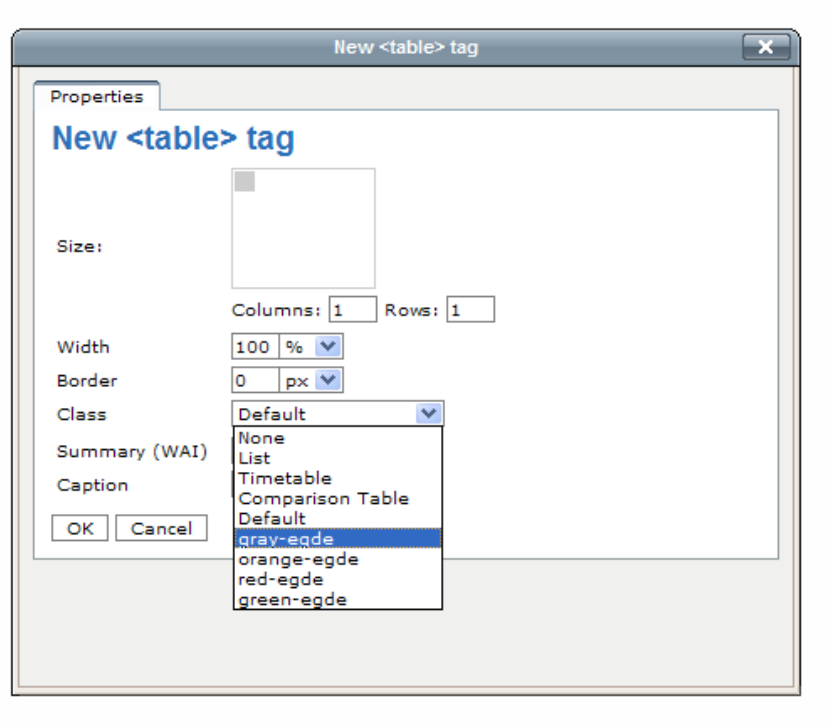


- Write the text in the table:

- Here is how a table with the choice of “green-edge” table looks on the web page:

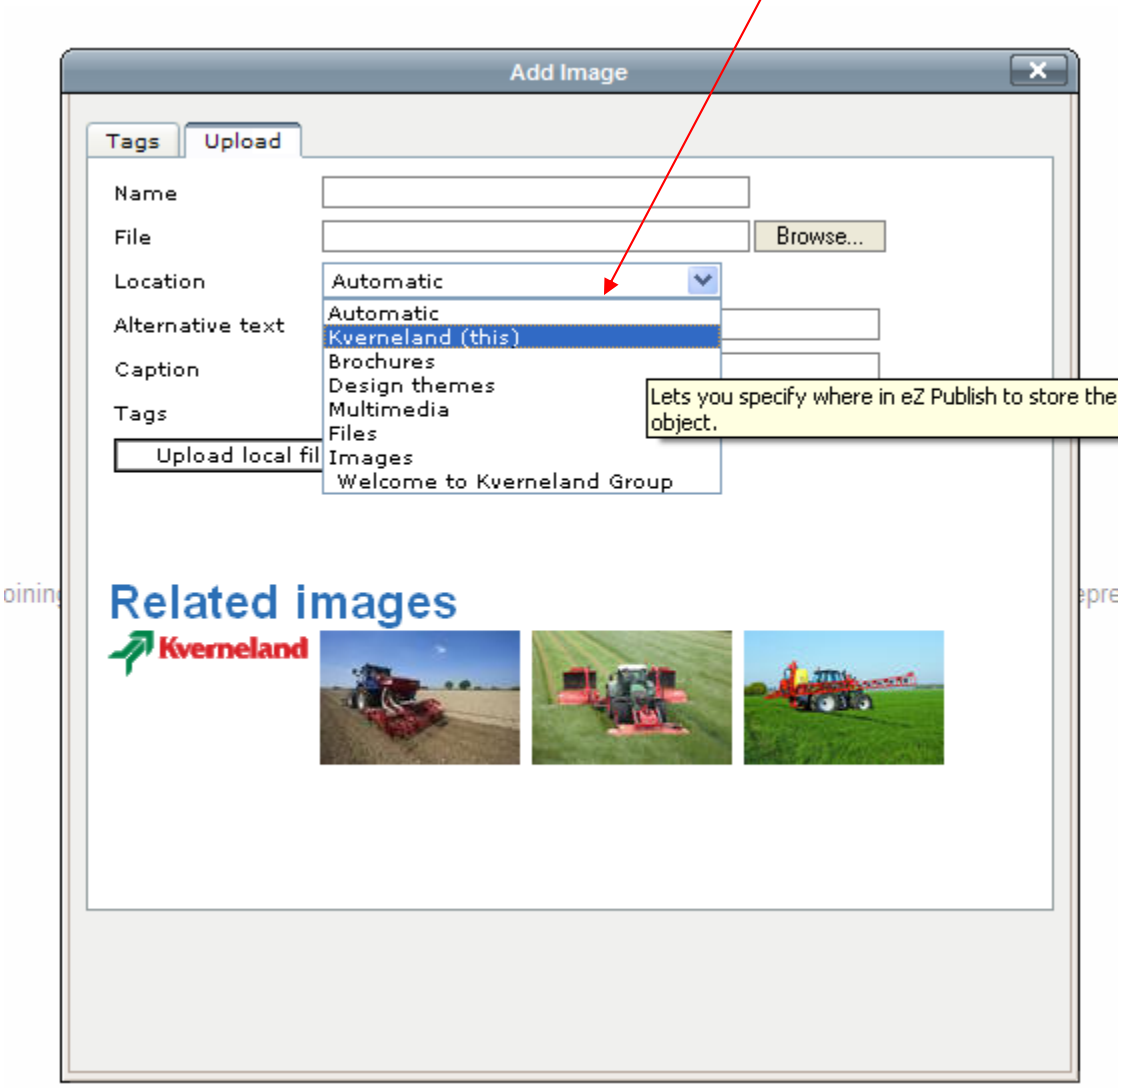
Tables for the Right hand Column

- The procedure is the same as written above, but in the box for “Class”, you have to choose one of the 4 choices at the bottom of the list depending on which site you are on. The safest is to use the “gray-edge”.
- Choose only **1** for Columns and Rows.

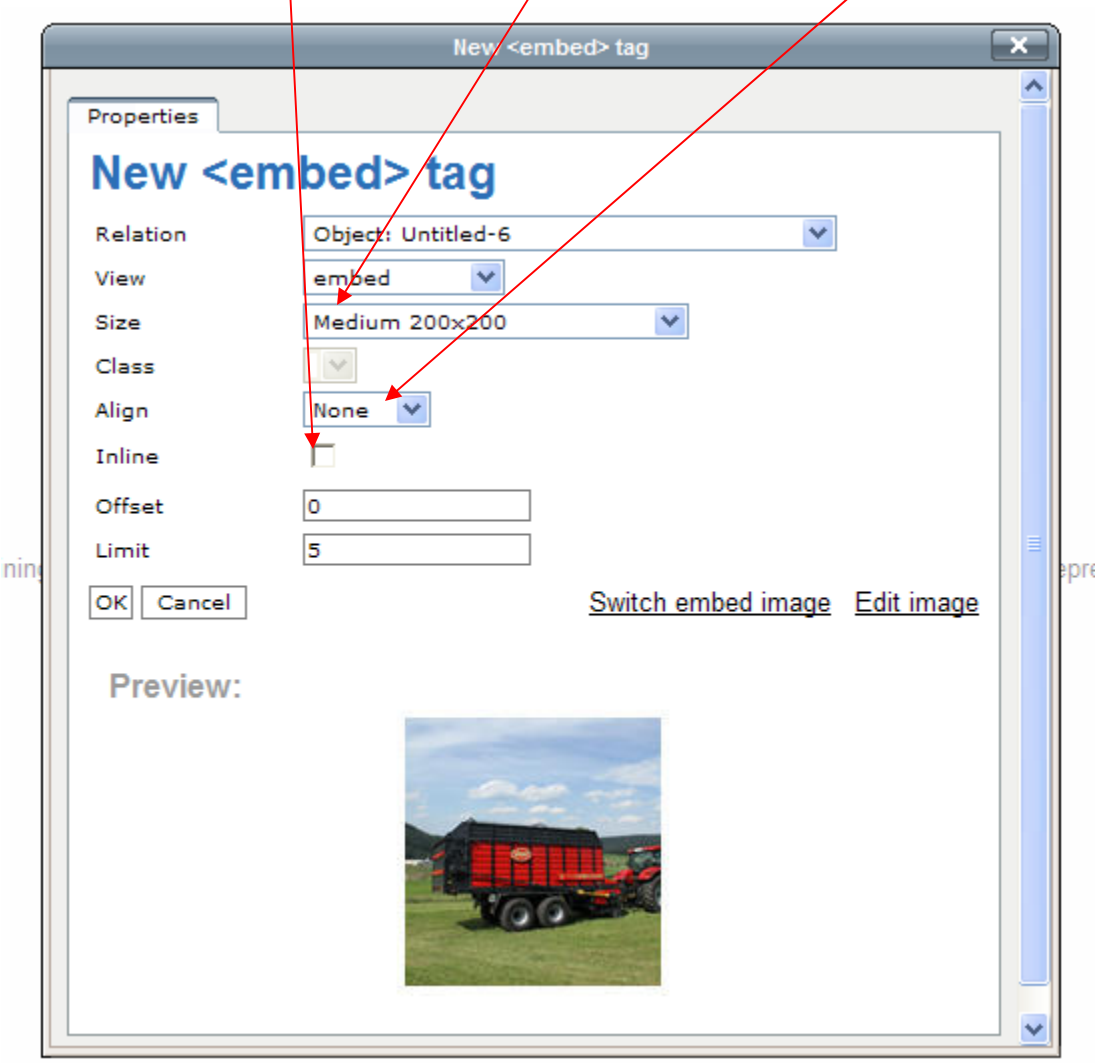


Uploading Images

- For uploading images into the article, choose this icon from the toolbar.
- In the new window that shows, you can add images from the Download Center by choosing tags or you can upload from your computer.
- If you upload images from your computer it is **Very important** that you, in the area "Location", choose the article you are working in. The example here is from and Article called Kverneland, and to choose this article, "Kverneland (this)" was selected. Click on "Upload local file".



- In the next window you have to choose the size for the image, on which side and if it should be with the text below or in the text. Click ok.

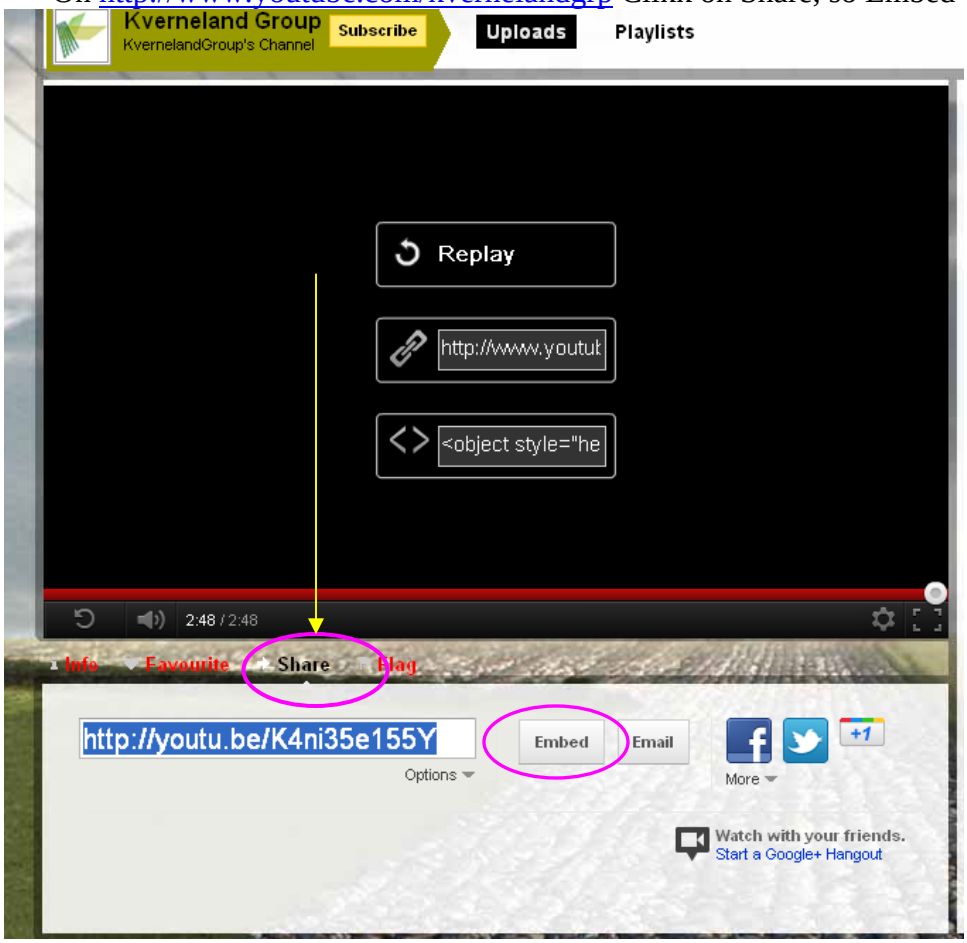


- Click on “Send for publishing”.

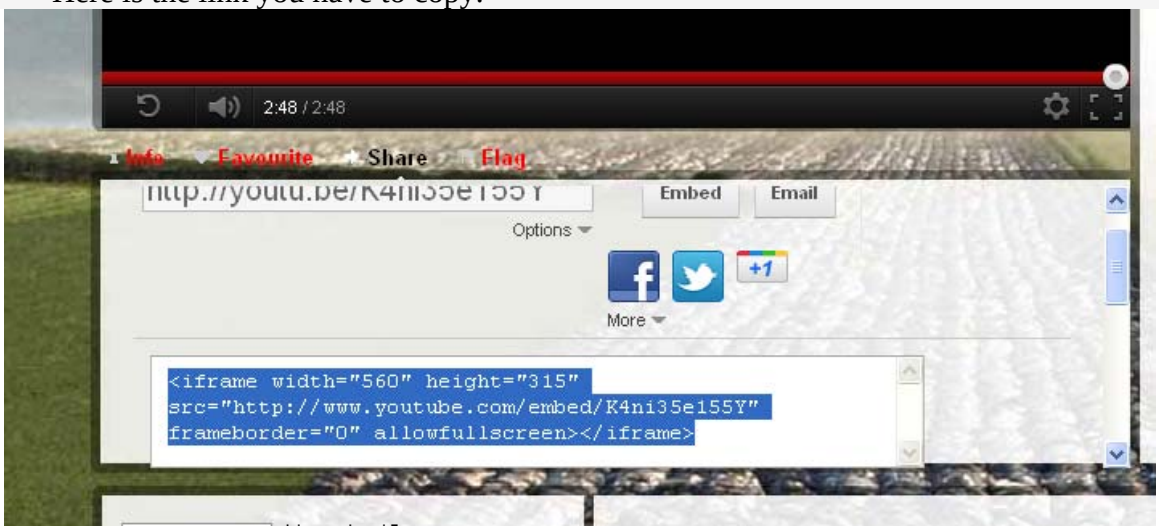
If you **do not want to save** your changes, please click on “Discard Draft”.

Video from YouTube into articles

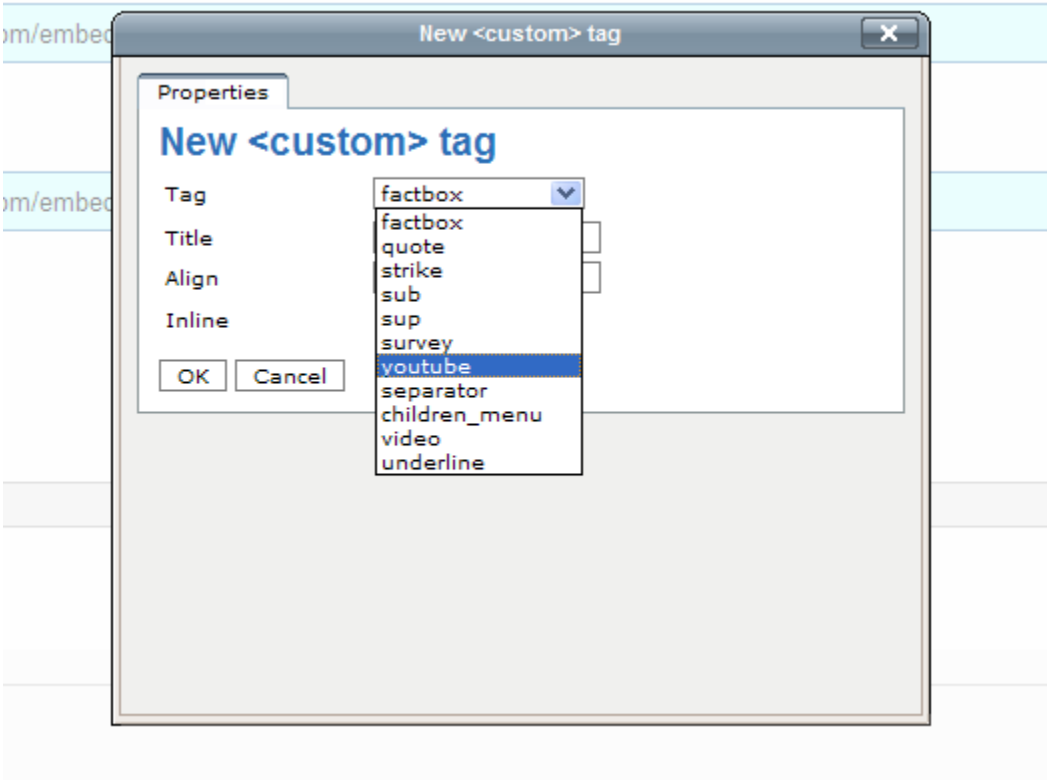
- On http://www.youtube.com/kvernelandgrp Clikk on Share, so Embed



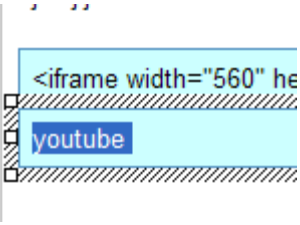
- Here is the link you have to copy.



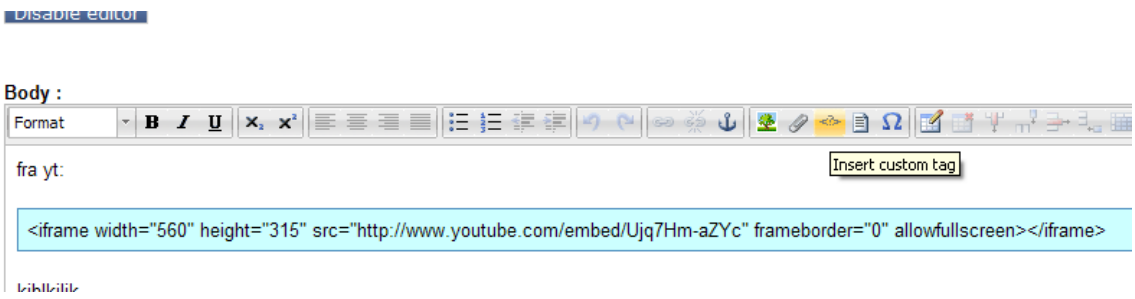
- In the article you have to click on this icon Choose youtube and click OK



- This blue area will show. Remove the words “youtube” and add the link you copied from YouTube into here.



- When inserting the link into the article, remember to break the link to youtube if it is active (unlink in our article)



CorporateFrontpage

On the national site there is an item called CorporateFrontpage. This is used to control the banner and add article links to the first page on the National site (xy.kvernelandgroup.com) (NB! This is NOT for the brand sites!)

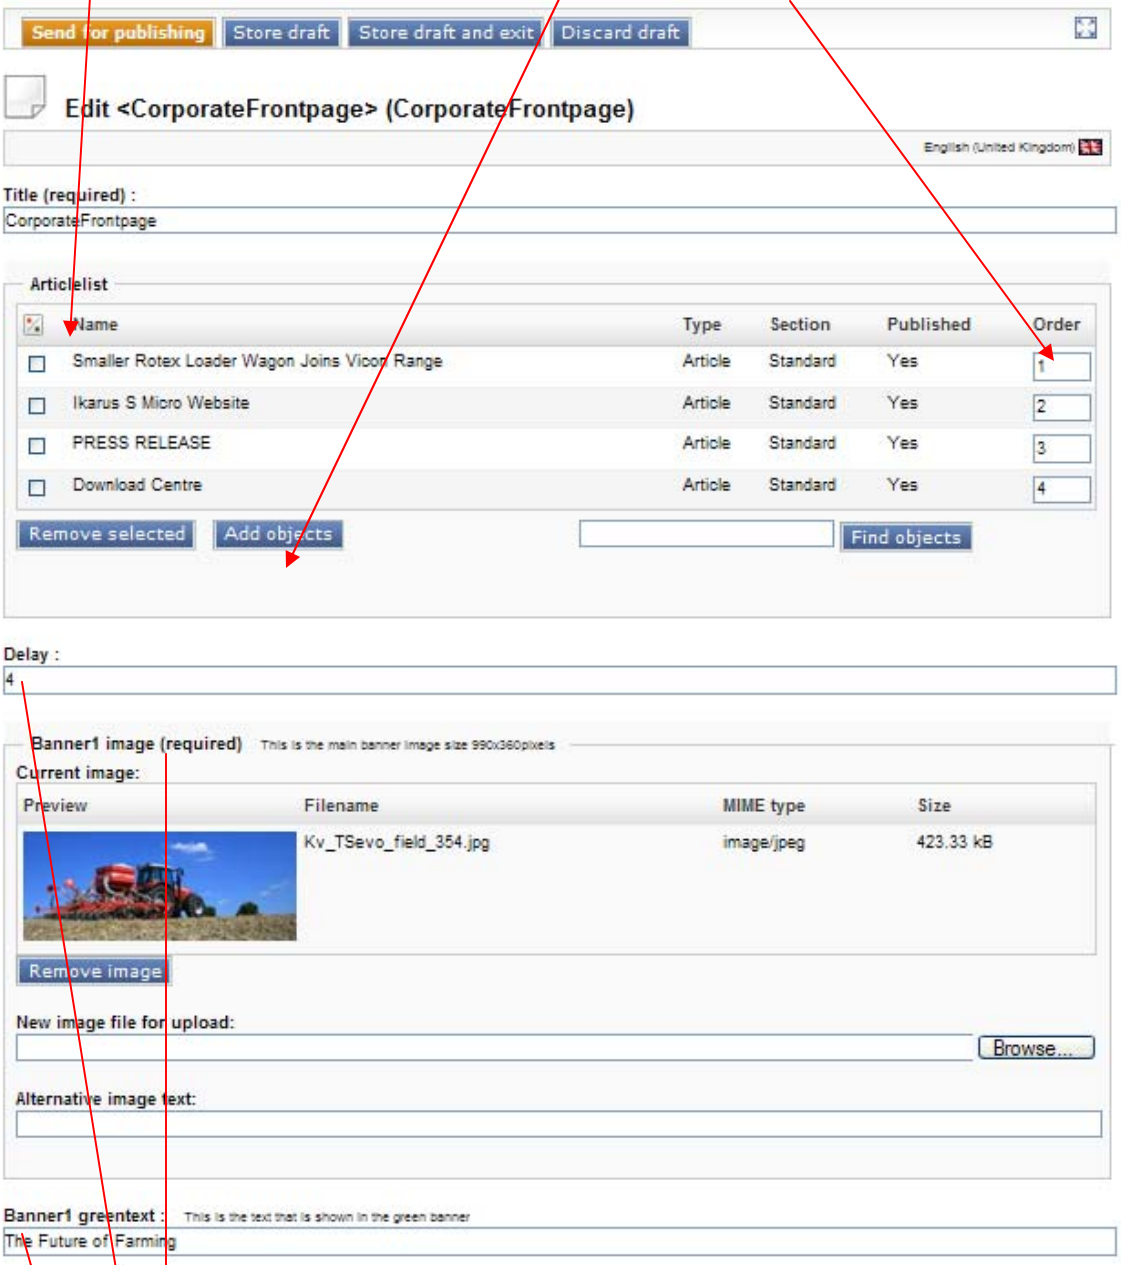
Work from the admin area http://admin.kvernelandgroup.com/

CorporateFrontpage is already made for all the national sites. In CorporateFrontpage you can fill in pictures, banners, text on the banner (green label), logos, url for the logo and article list to show articles in the small boxes.

The banner pictures have to be 990x360 pixels.

Explanation step by step:

Articlelist are the items you want to show on the Home page in the 4 boxes. Choose the articles you want to show by clicking on Add objects and browse to the article (shown in the screen dumps in the next page). The order is set by choosing numbers under “Order”.

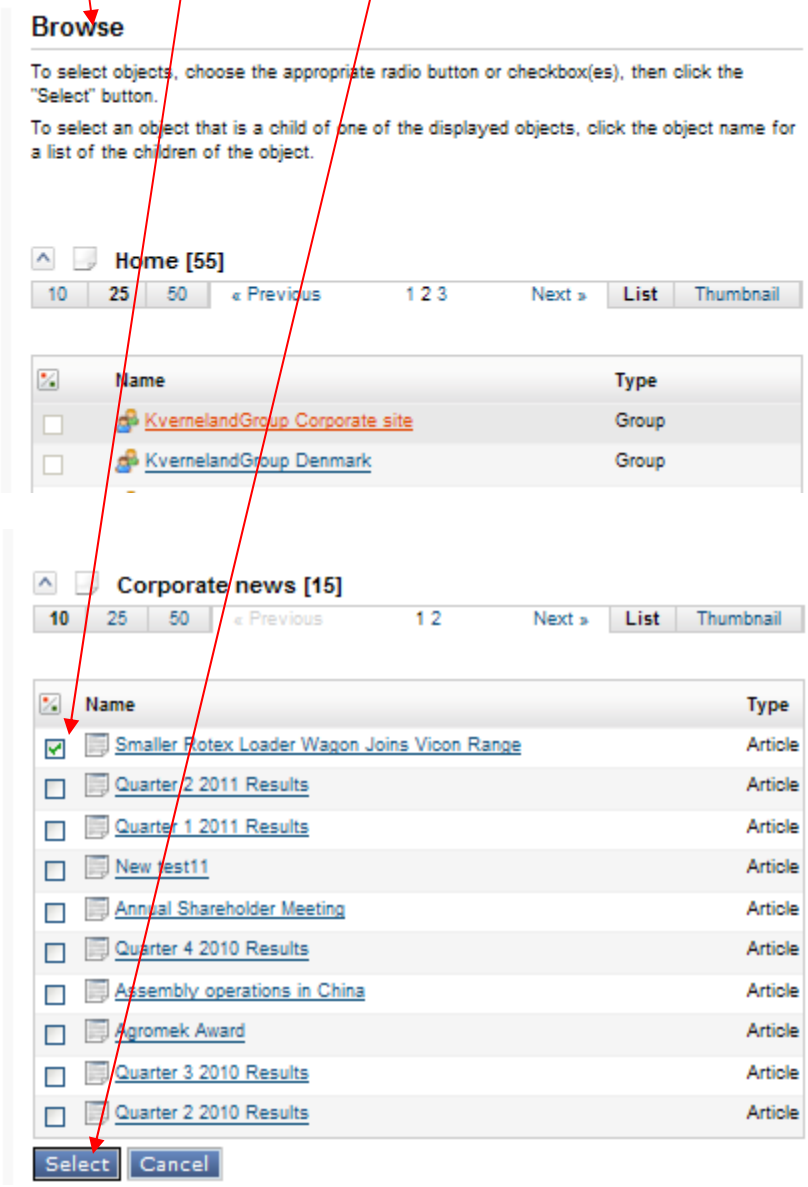


- Delay is how often the banner pictures are going to change (in second).
- Banner1 image. The size of this has to be 990x360 pixels. Browse and find your picture.
- Banner1 greentext. This is the text for the green label on the banner. For this page we STRONGLY suggest to use “The future of Farming”

Browsing to articles

How to browse to the article you want to show on the Home page.

- Mark the article and click on Select.



Browse
To select objects, choose the appropriate radio button or checkbox(es), then click the "Select" button.
To select an object that is a child of one of the displayed objects, click the object name for a list of the children of the object.

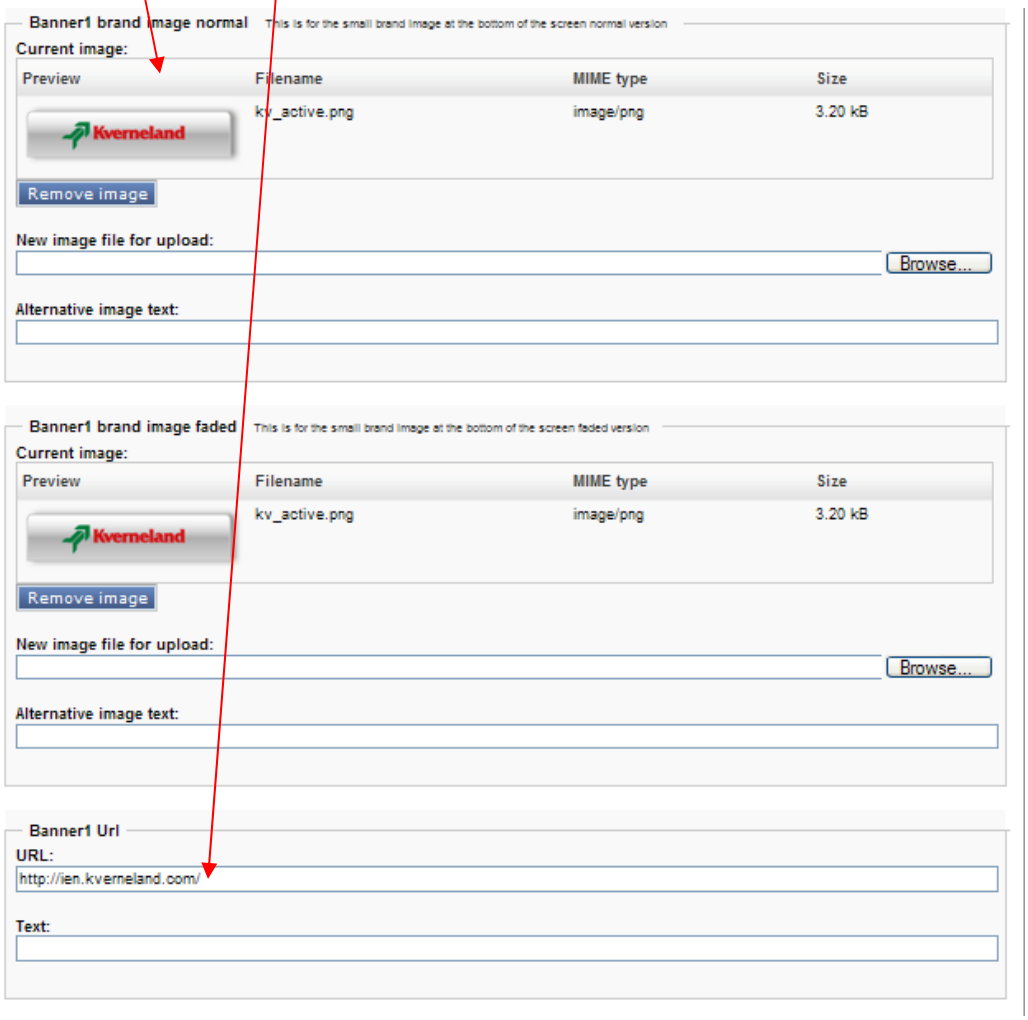
Select Cancel

- The buttons for choosing Kverneland and Vicon have to be added here. These logos are special made. Ask web master or central web publisher to send them to you. Add the logo on both “Banner1 brand image normal” and “Banner1 brand image faded”.

- Add the url to the actual site for this button. You need the whole url to your brand site.



- Do the same for the Vicon logo and url:

- Add the other banner images and “Banner greentext”.
- Send for publishing.

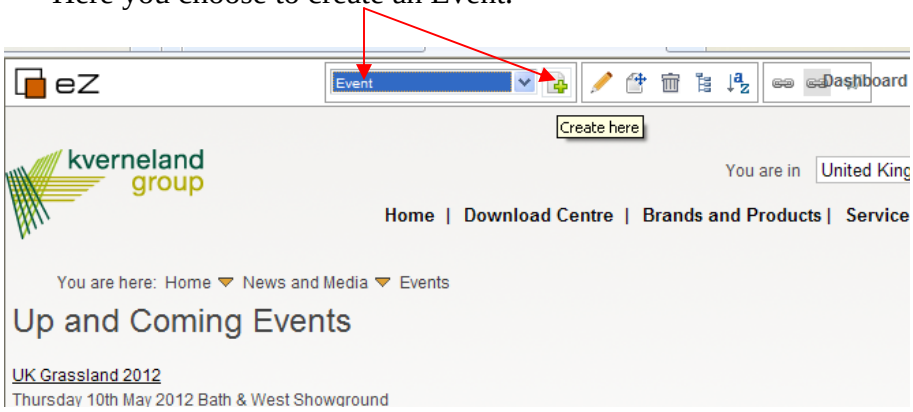
The “Banner3 and 4 brand image normal” and “Banner3 and 4 brand image faded” we are not going to use unless you have more than 2 brands in your market.

Events

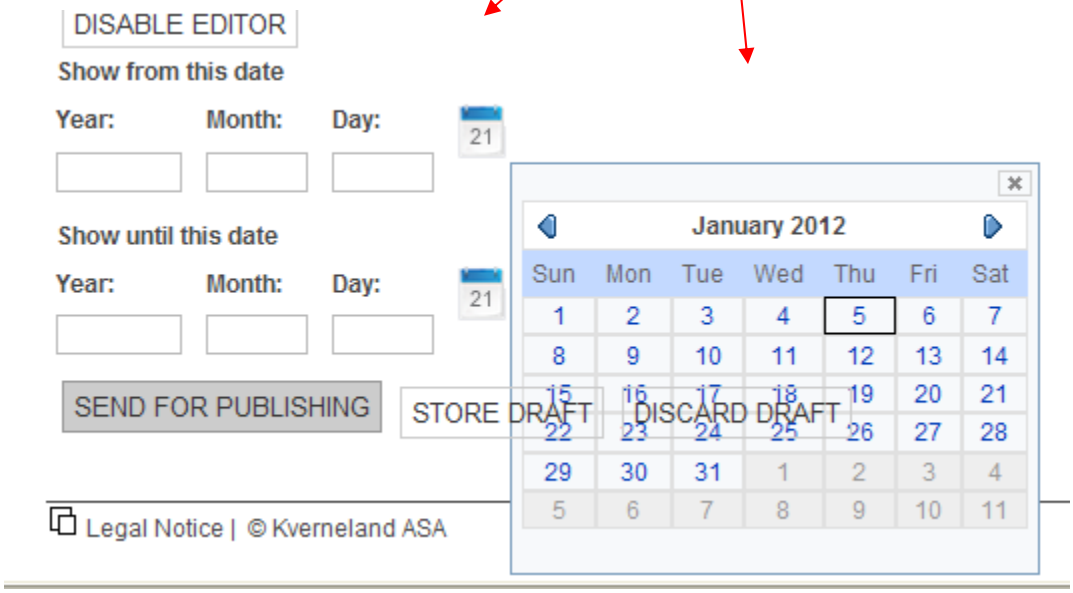
How to make events

All Evenst made on the national sites will automatically show on the ien Corporate site. Here you can see what shows on our Corporate site for the time being: http://ien.kvernelandgroup.com/News-and-Media/Events-for-All-Countries

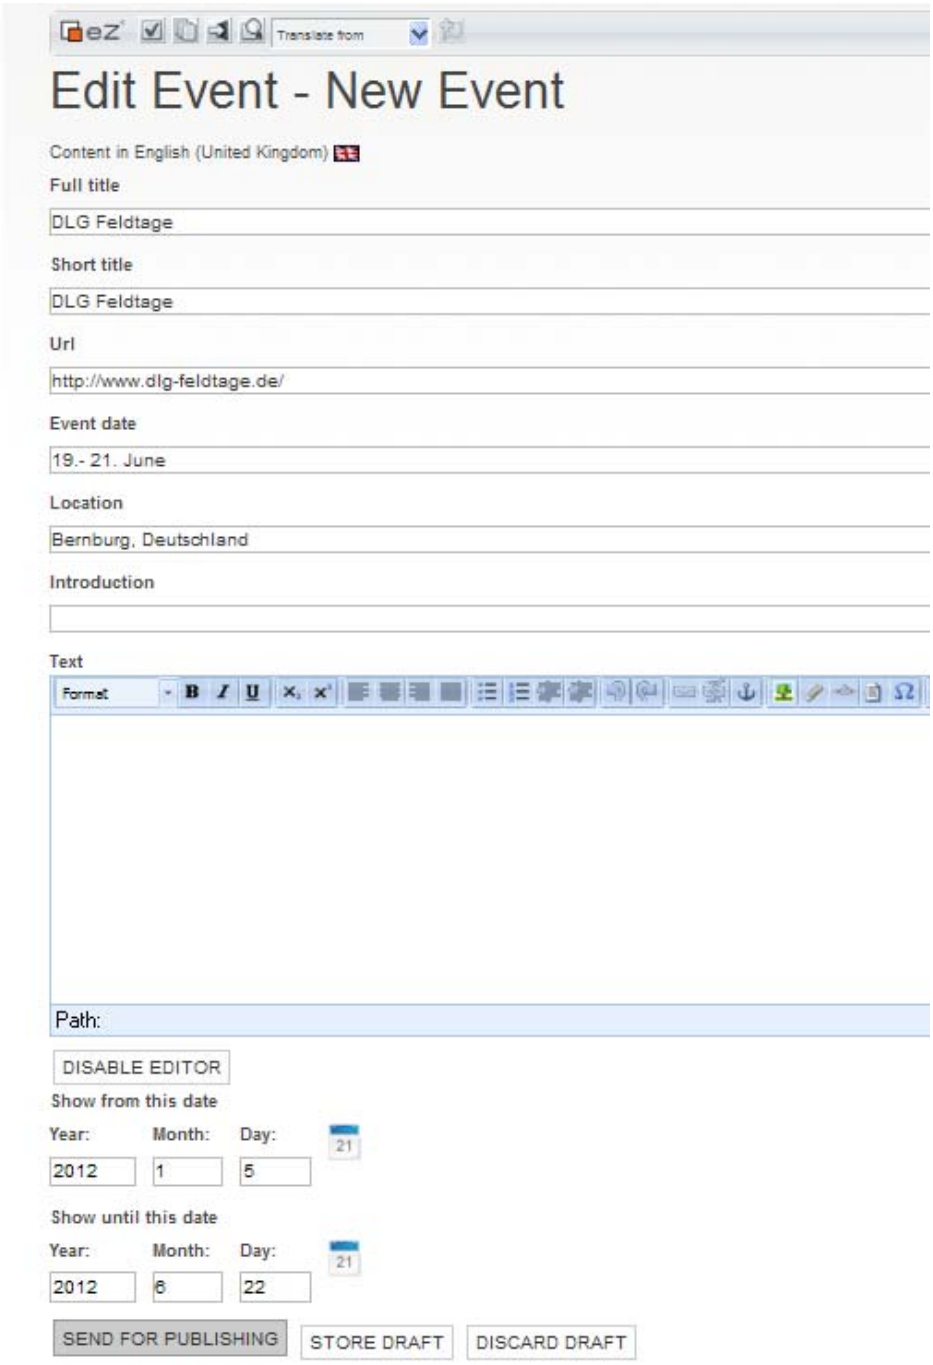
- Log into your national site, and go to: News and Media/Events folder
- Here you choose to create an Event.



- Fill in the form. In the screen dump on the next page are examples for how to fill in the form. Areas filled out with information in the example are “required”.
- In the bottom of the form you have to choose date for “Show from this date” (use today’s date) and “Show until this date” (after this date the event will not show on our site, so use the day after the event is over). Dates are choose by clicking on the calendar.
- Click on “Send for publishing”.



How to fill in the form for Event



(If you want to change something to an already made Event, this has to be done from the admin area.)

Url to the Event:

If you do not have an extern url to add, you need to add the url to the Event on your national site. Save the event, get the url from your national site and add this into the Event.

PR: Upload Press Releases (File)

- Navigate to the folder for Press Releases.
- In the toolbar, Choose File and click on the + (Create here)

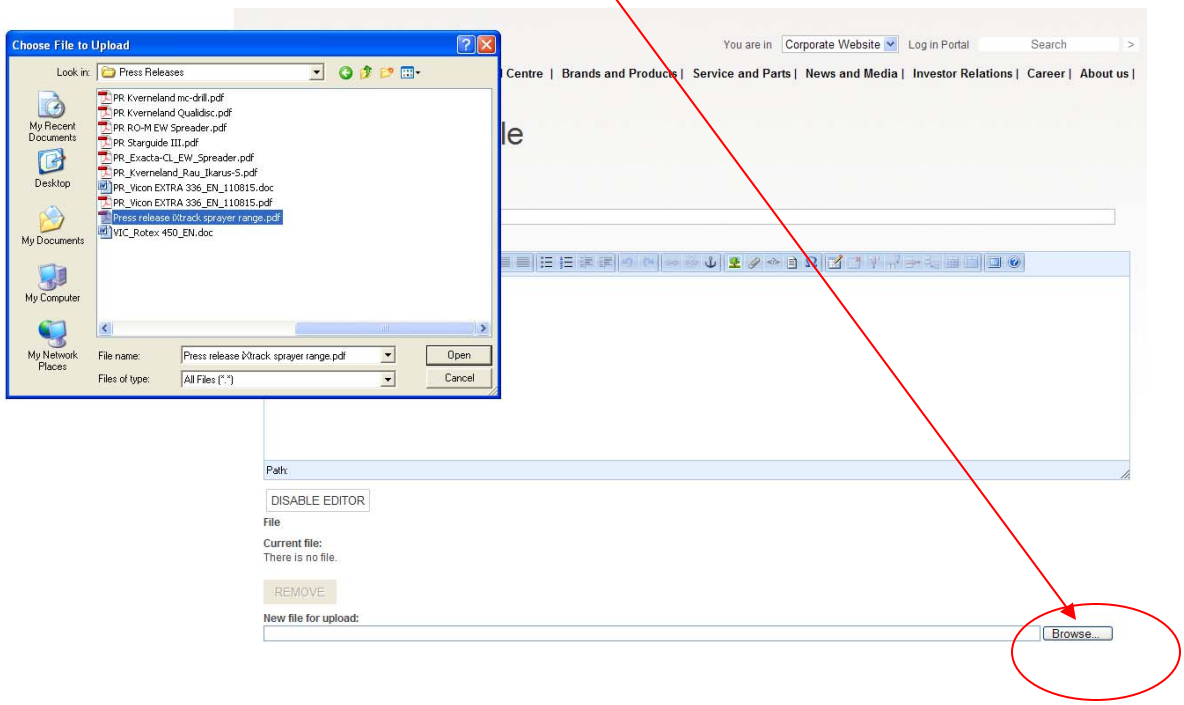
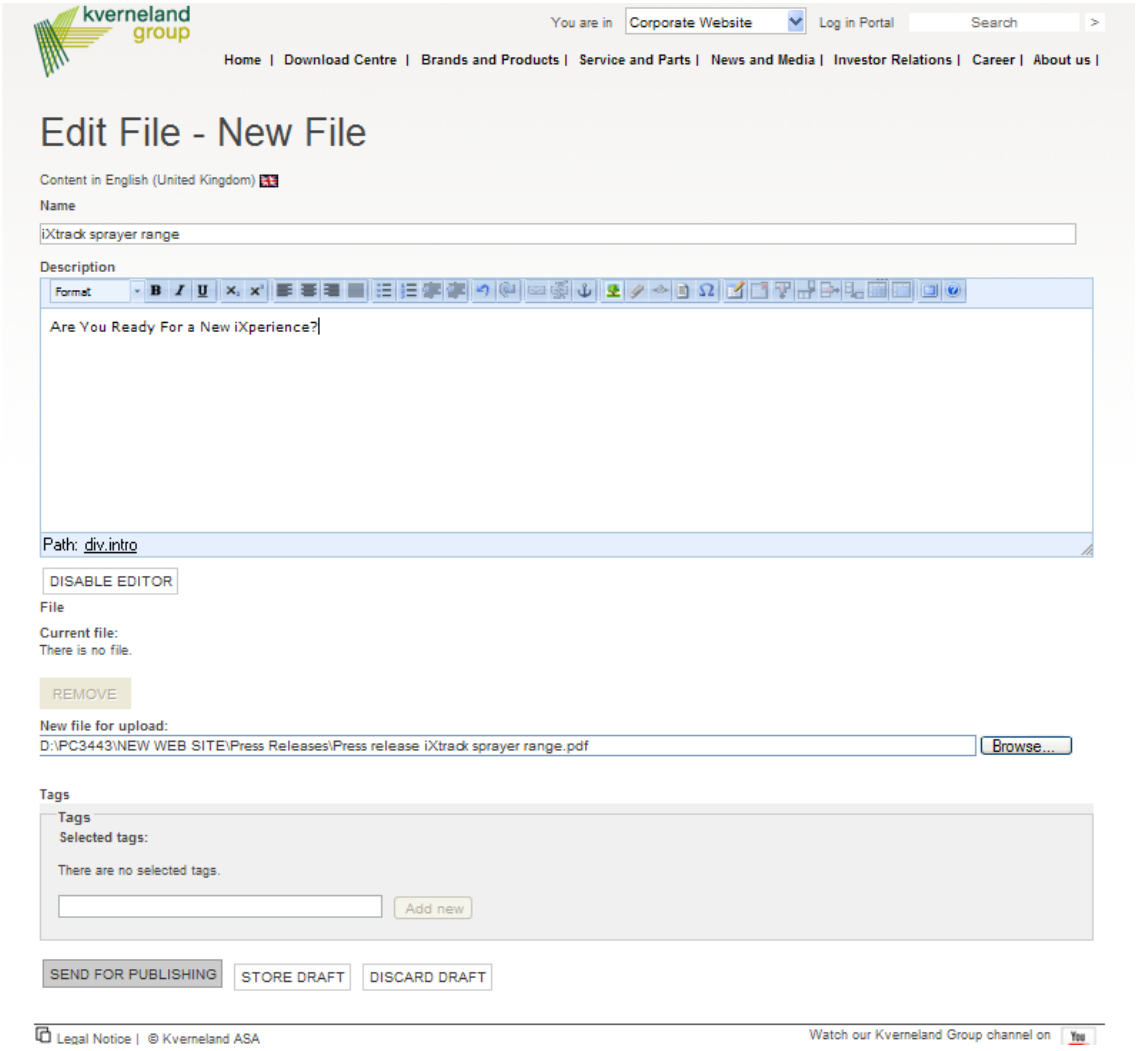
- Browse to the file on your computer for uploading.



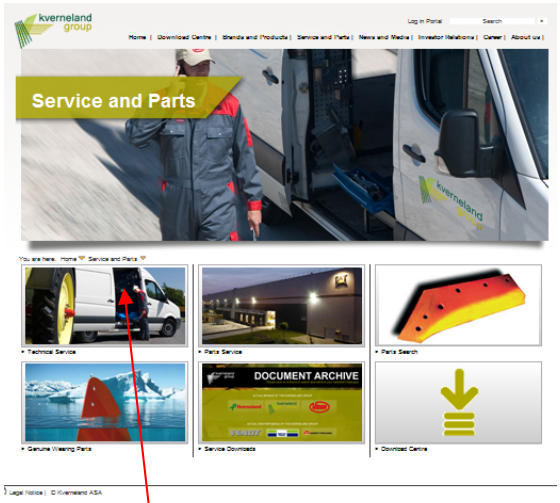
- Write the name for the file and add a description (this is the subtext).
- Send for publishing.

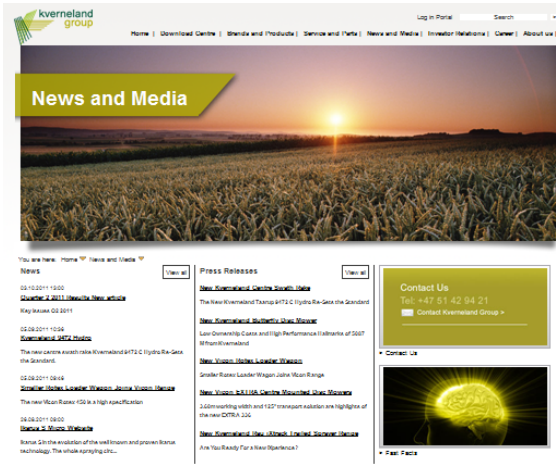


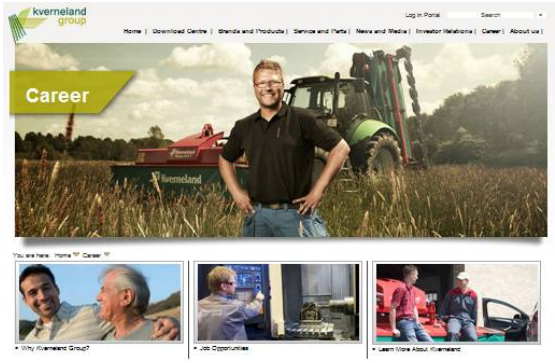
ArticleList

How to make an ArticleList

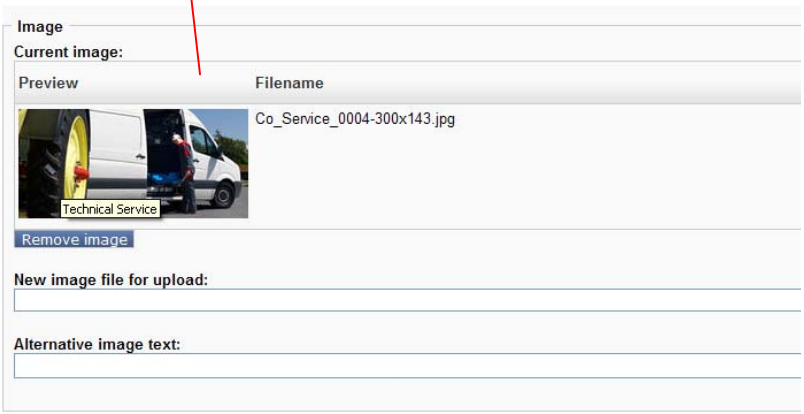
Here are some examples for how the ArticleList will show on the web site:



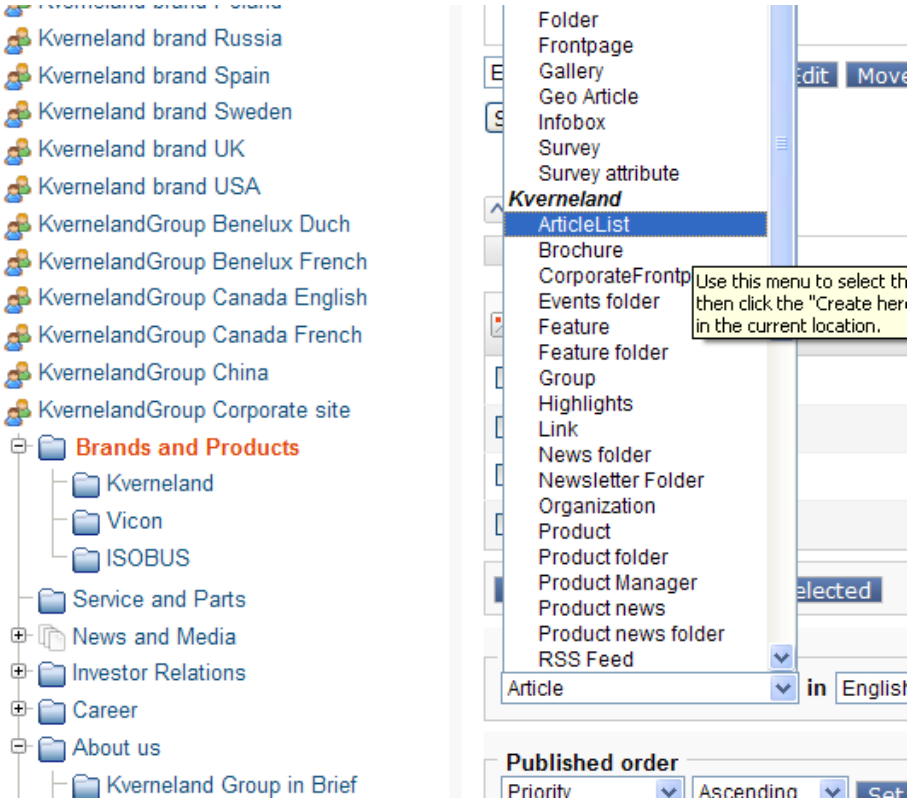




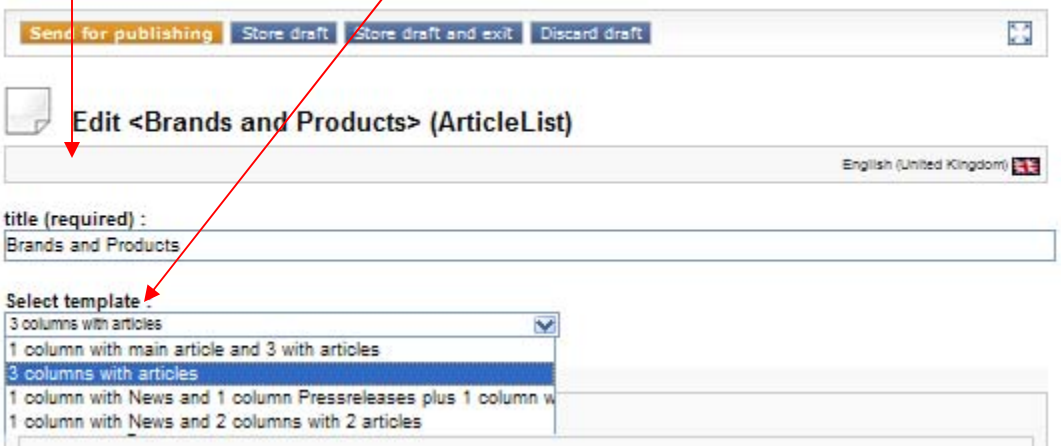
- Work from the admin area.
- The pictures shown in the small boxes are added into the article you want to show. The size of these pictures are 300x143 pixels and has to be uploaded in the article, (here you see the article about Technical Service in the folder Service and Parts):



- Go into the Folder where the ArticleList are going to be added on your site.
- Choose ArticleList from the menu and click on click “Here”.

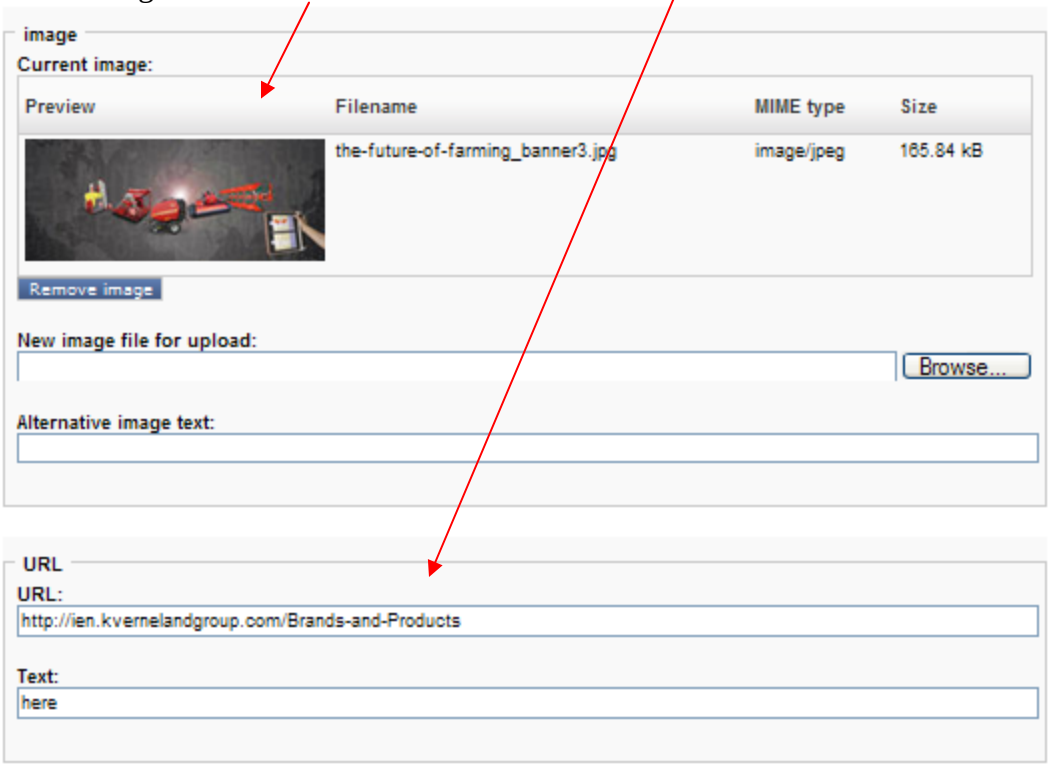


- Fill in Title. This will be the text on the banner.
- Her you choose which template you want to use.

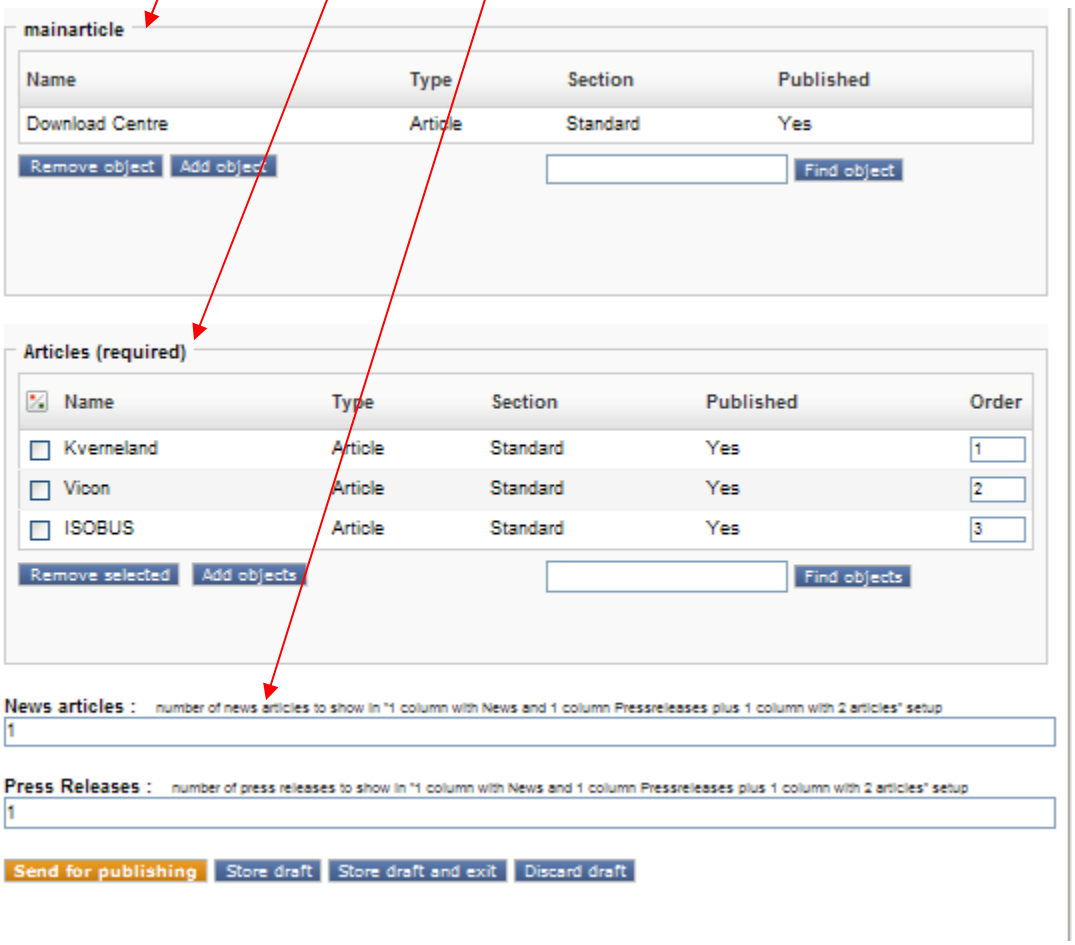


Send for publishing
Store draft
Store draft and exit
Discard draft
Edit <Brands and Products> (ArticleList)
English (United Kingdom)
title (required) :
Brands and Products
Select template :
3 columns with articles
1 column with main article and 3 with articles
3 columns with articles
1 column with News and 1 column Pressreleases plus 1 column w
1 column with News and 2 columns with 2 articles

- Upload the banner image (NB! Size National site 990x360 pixel, brand site 999x360)
- Add the URL for the Folder on your site where this list is. You have also to write something in the Text area underneath the url.

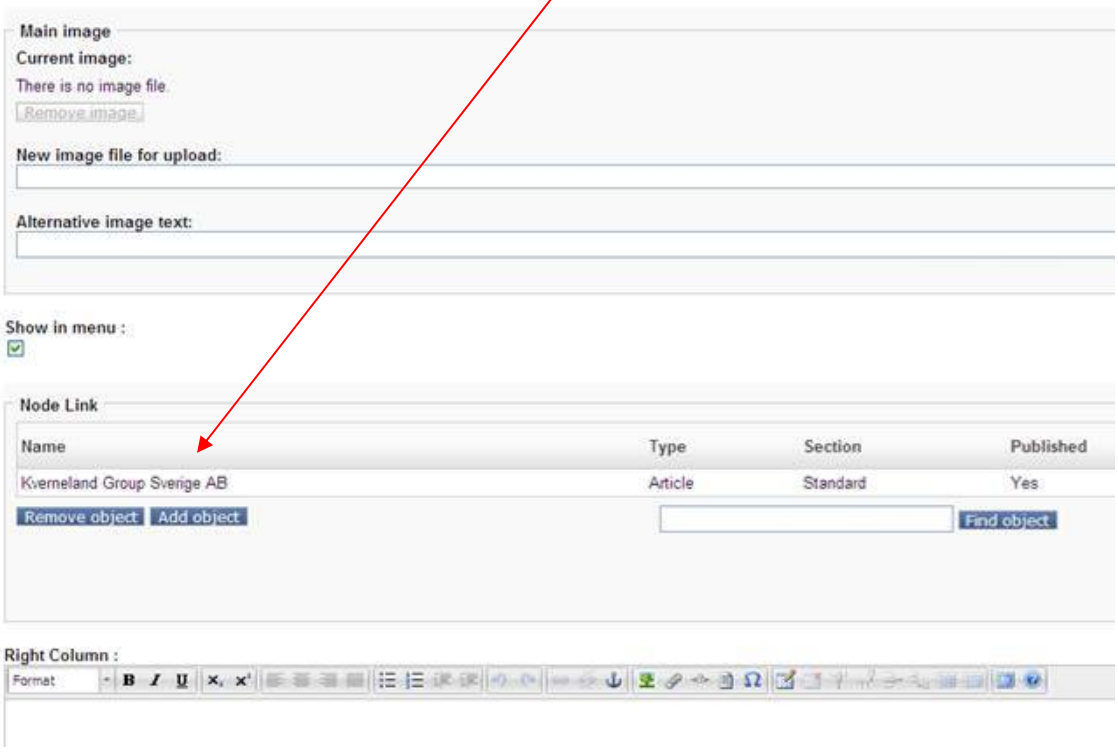


- Link to mainarticle and Articles by navigating to the article. Click on Add objects.
- If you have chosen the template for News in the News folder, you can change the number of how many articles and Press Releases you want to show. Normally it is 4 news and 5 PR.



If the ArticleList do not show

when you click on the folder on the web site the reason can bee that there is added a “Node Link” to the Folder. In the previous version, we had to add this Node Link, otherwise the articles would not show properly. Here is a picture for where you can delete this Node Link: Click on “Remove object” and send for publishing.



ArticleList linked to another ArticleList

How to make an ArticleList linked to another ArticleList

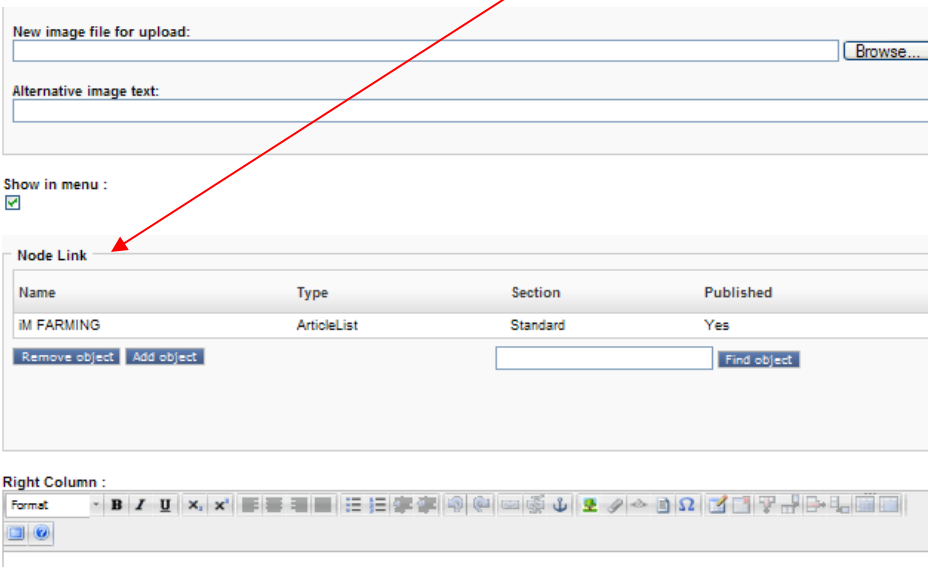
(If you want to have an ArticleList further down in a Folder, here is the way of doing it.)

NB! ArticleList must ALWAYS be made in the admin area.

- Create a Folder where you create ArticleList, Folders and Article (it is not necessary to make folders if you only are going to make a few Articles). See the description in the file “How to make ArticleList”.

- In the ArticleList, you have to make the links to the Articles.
- And so to THE IMPORTANT THING FOR MAKEING THIS WORK! Edit the **Folder** you are working with. Scroll down until you find the area for “**Node Link**”. Here you have to click on “Add object” and find the ArticleList you have made.

- In this Folder you also have to add a “Main image” (this is the clickable image in the first ArticleList) and a “Banner image”.



Here are screen dumps taken from an already made case. You will find it by clicking on this link:
http://ien.kvernelandgroup.com/Brands-and-Products

Here is how it looks like when finished: Click on the image or text for iM FARMING:

Legal Notice | © Kverneland ASA
Watch our Kverneland Group channel on

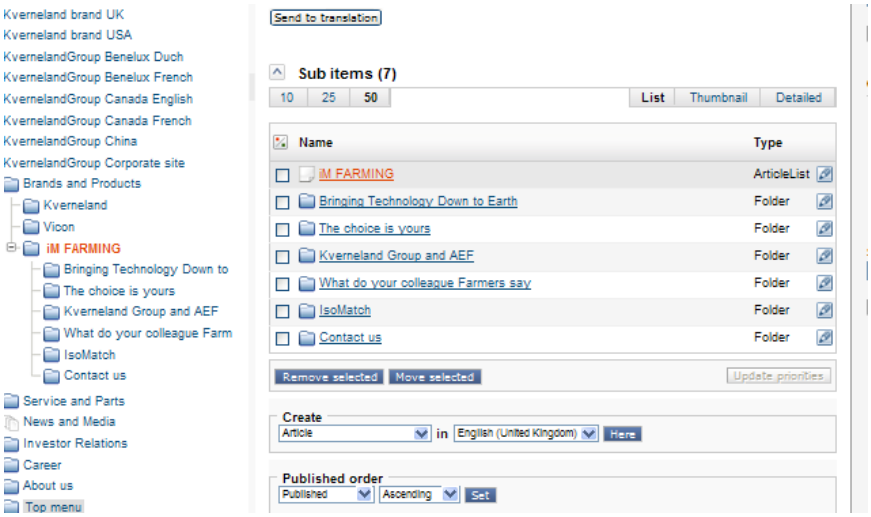
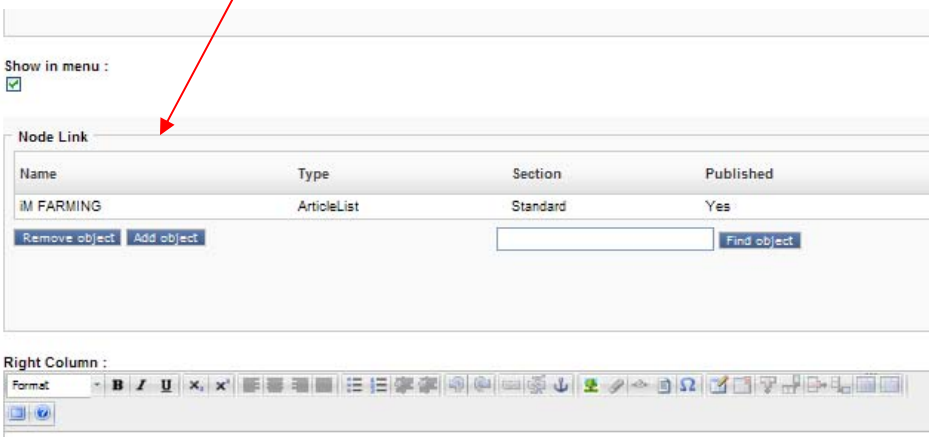
-From the Admin area it looks like this:
Here you can see the Folders and ArticleList. All the links to the ArticleList called iM FARMING is made in the normal way (see the description in the file How to make ArticleList).



- To link this ArticleList “iM FARMING” to the ArticleList “Brands and Products” (the first ArticleList in the folder) you have to do this:

- Edit the **Folder** you are working with (in this case called “iM FARMING”). Scroll down until you find the area for “**Node Link**”. Here you have to click on “Add object” and find the ArticleList you have made (in this case it is iM FARMING). THIS IS THE IMPORTANT THING FOR MAKEING THIS WORK!

- In this Folder you also have to add a “Main image” (this is the clickable image in the first ArticleList) and a “Banner image”.



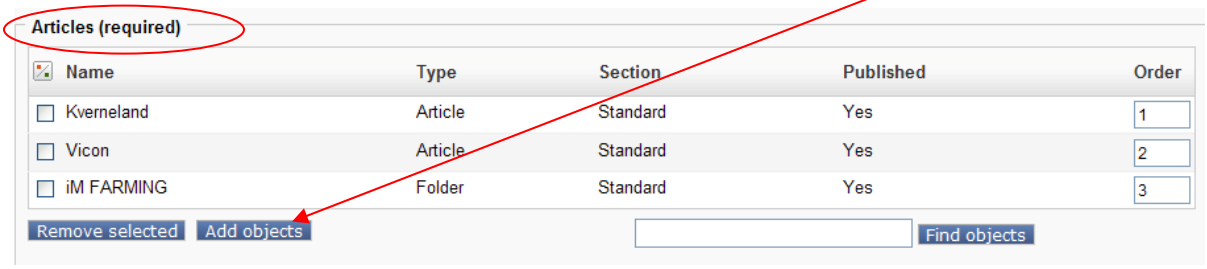
External web addresses in ArticleList

How to add external web addresses to the image boxes for the ArticleList

- Make an Article. In this you need the image that is going to show on the ArticleList and add the external url. In this example there is just used an already made Article.
- Add an image in the area “Image”. This will show in the ArticleList.

- The external url is typed in the box fro “Url Replacement”.
- External url should always be opened in a new window. Make a mark in the small window for “Url Replacement in new window”.

- Work from the admin area for making an ArticleList (or edit an already made one). In the ArticleList, add the articles into “Articles (required)” by click on “Add objects” and navigate to the articles (click “Select” to go back to this window).



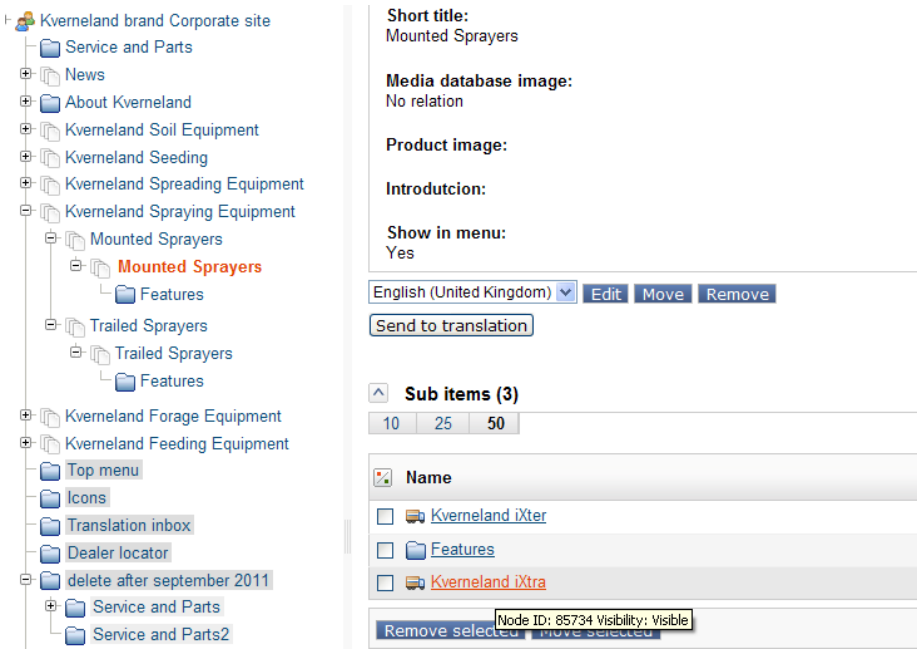
- The link is now added to the image that will show on the web site.
- You can have 3 og 6 boxes with images in the ArticleList. See the explanation for this in the chapter “How to make an ArticleList”.

Sending items for translation to other sites

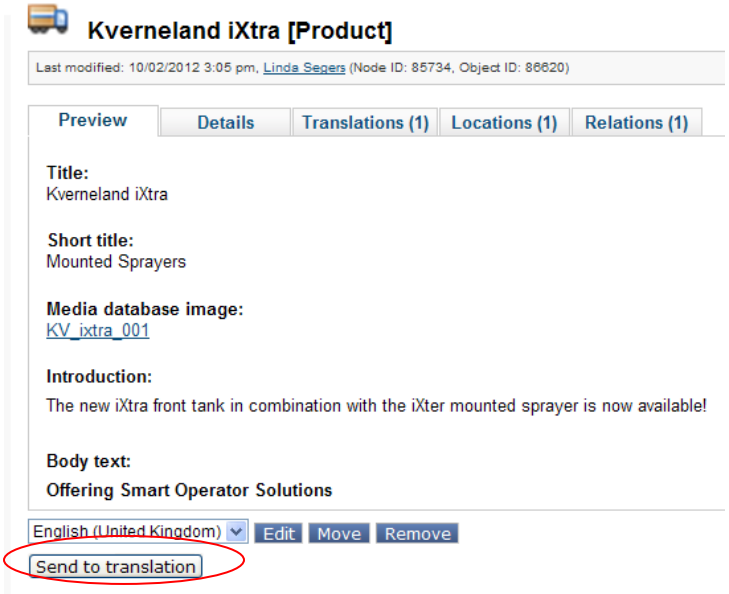
A tool for BA Marketing Managers

This is a tool for BA Marketing Managers to inform local web publishers about updates they have made onto the International English “master versions”.

- Find your current article/product and click on it.



- This window will now show. Click on the button “Send to translation”.



- The window beneath here will show. Please set a mark in the small box in front of the site where the article/product should be copied to. Click on “Send to selected”.
- The item has now been copied to a folder on all the sites marked in this window.
- For the local publisher it is visible on their Dashboard. If you want to check the copying, you can go into http://admin.kvernelandgroup.com . Go to one of the sites and check in the folder “Translation inbox”.

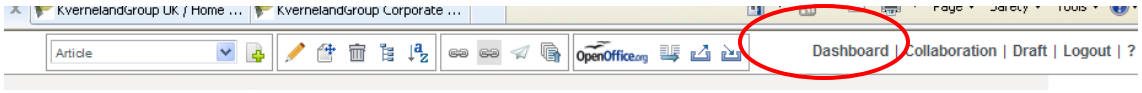
Items for translation

On your web site, you have on the toolbar, a choice to enter to your Dashboard. This is the same as when you go into the admin area. Some of the things you can see on the dashboard are “My drafts” and “Translation inbox”. When new articles/product information, or changes to current documents, has been made on the international page (Corporate or Brand) you can find the article in the Translation inbox. It will be added to your box by a PM or our Central Publisher.
You must decide if the article should be translated and used or just deleted.
If you are going to use it, here is the procedure:



- Click on “Dashboard” on the toolbar that you get when you edit your local site. (You may also go to http://admin.kvernelandgroup.com, but that is not described in this document.) Here is how window looks like when pressed on “Dashboard”.

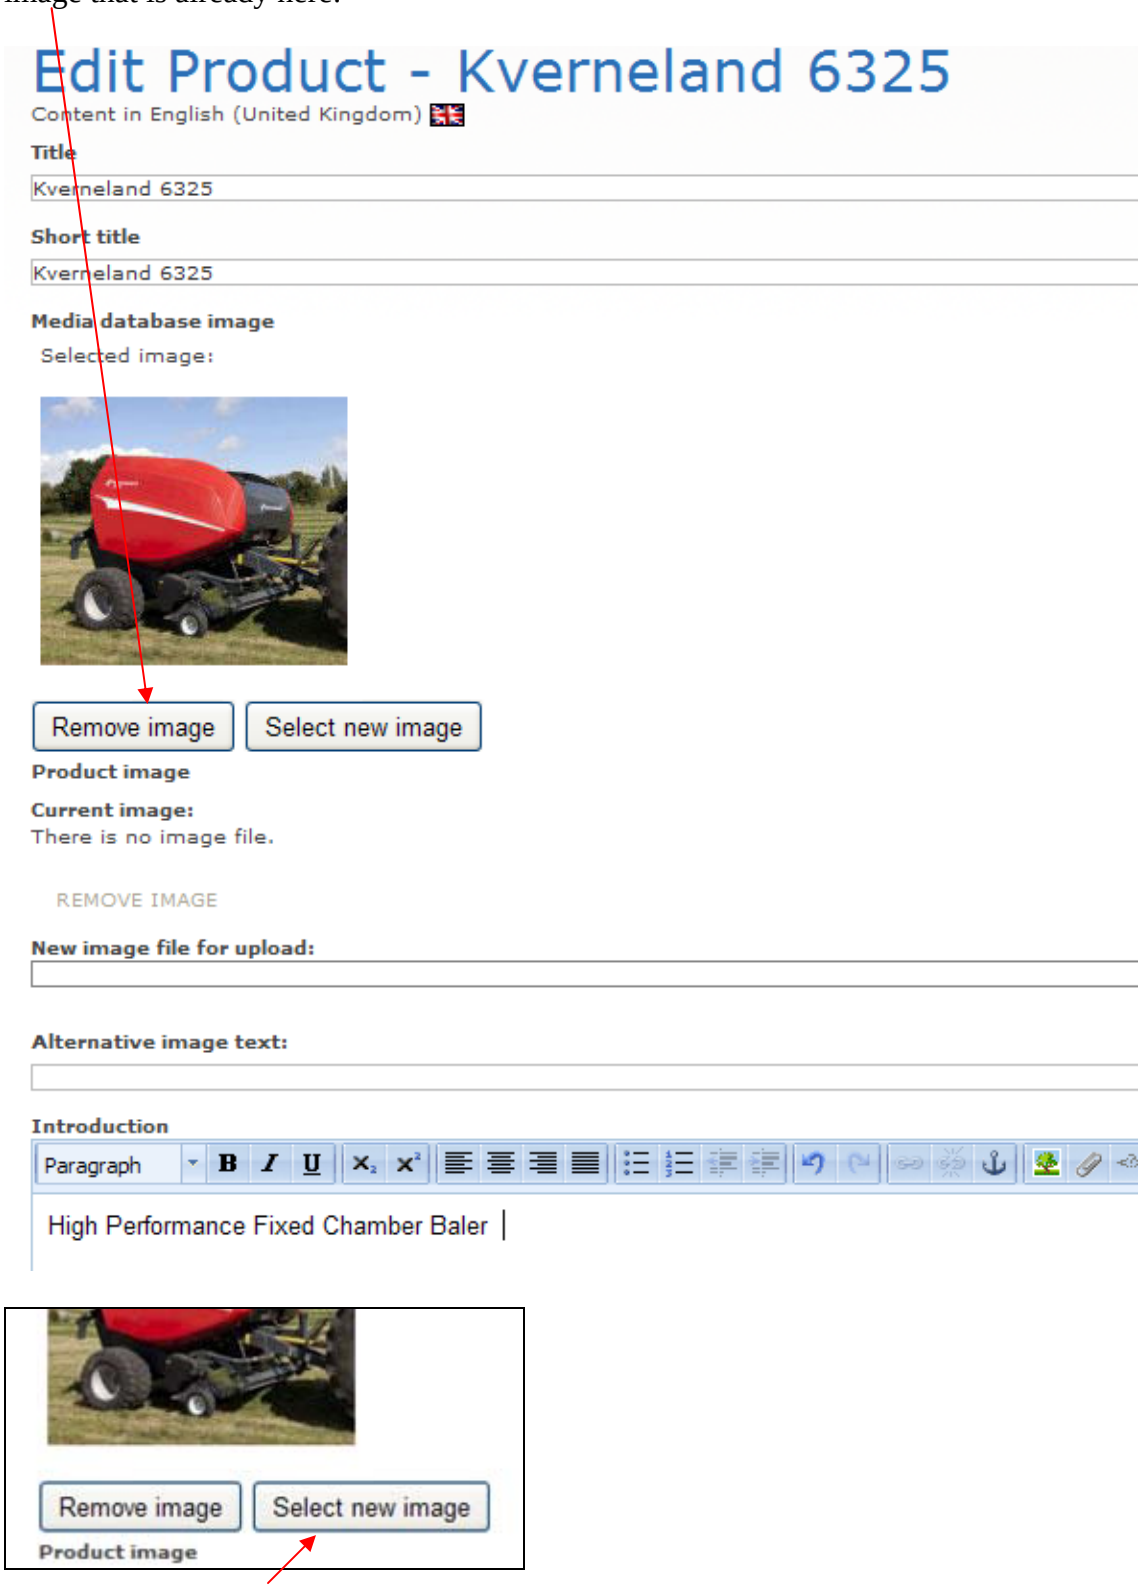
Bale Equipment » Kverneland 6325
The new Kverneland 6325 full roller fixed chamber baler is designed for intensive

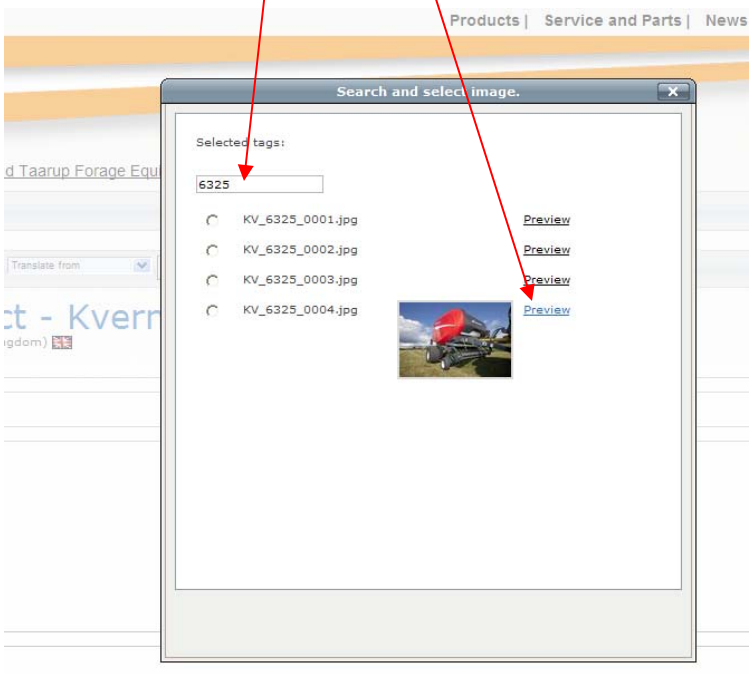
To change the main picture on the right hand side, you have to remove the image that is already here:

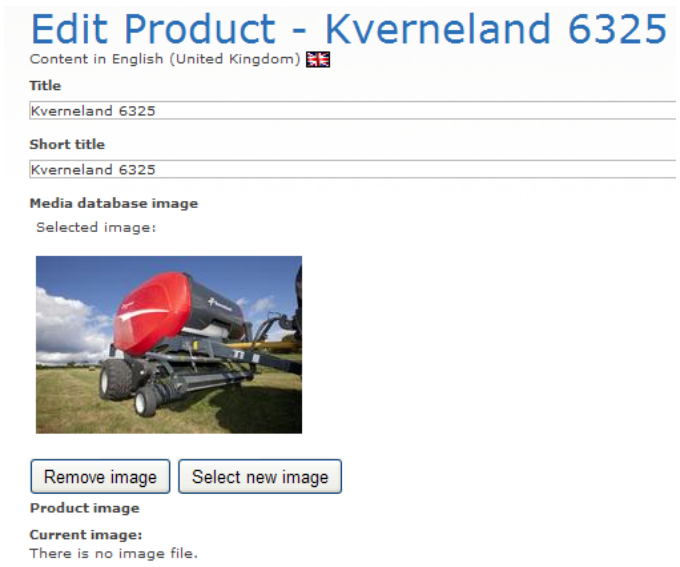


- Click on “Select new image”,

- and a dialog box will show:
- Write the name of the machine here and the pictures matching your typing will show. By holding the mouse button over “Preview”, a small picture will show. Find your picture and click in the circle. The picture is now added to the product information.

- Make sure you choose a picture that suits into the frame. The system will automatically crop the picture, so portrait version pictures will most likely not be a good choice.





Body text is the main text.

- For easier to see what is pasted into this area, click on the icon and you will get this area in full screen mode. To get back to the other view, click the icon once more.

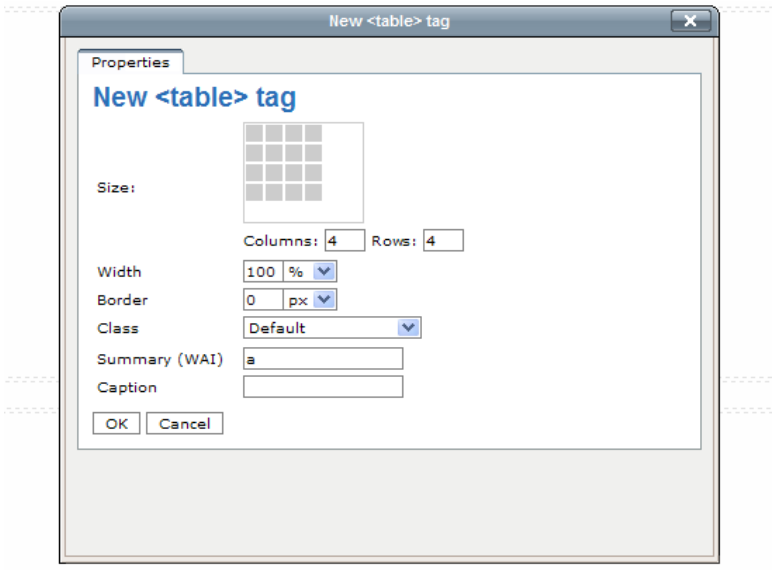
Making tables

- Click on this icon and you will get this window.

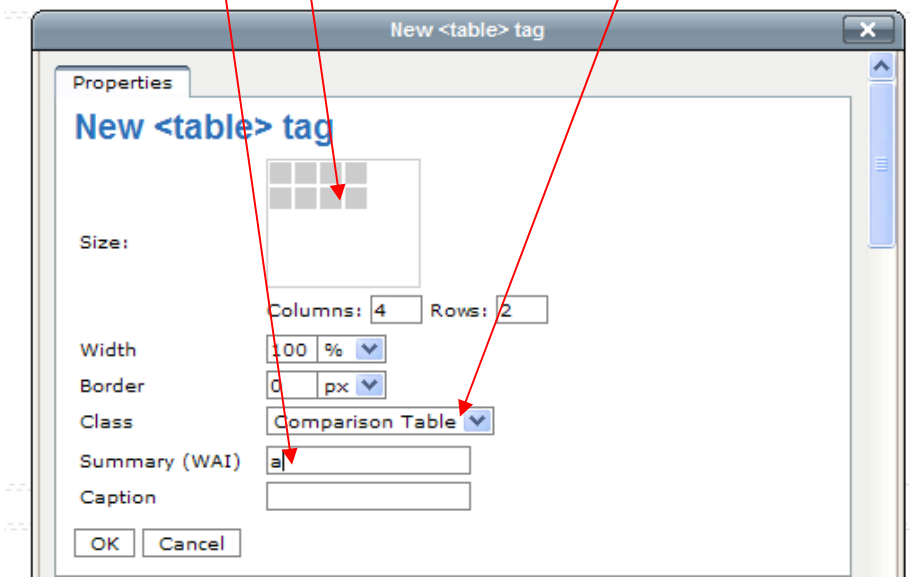


In text fields for the **Technical Specifications**, tables can now have a pre-defined look. Follow the description here:

Make your choice for:

- how many columns and rows you are going to have
- in the box “Class”, choose “Comparison Table” (IMPORTANT!)
- always write a letter or a number in the box “Summary” (anything)

Click OK.



- Write the text in the table:

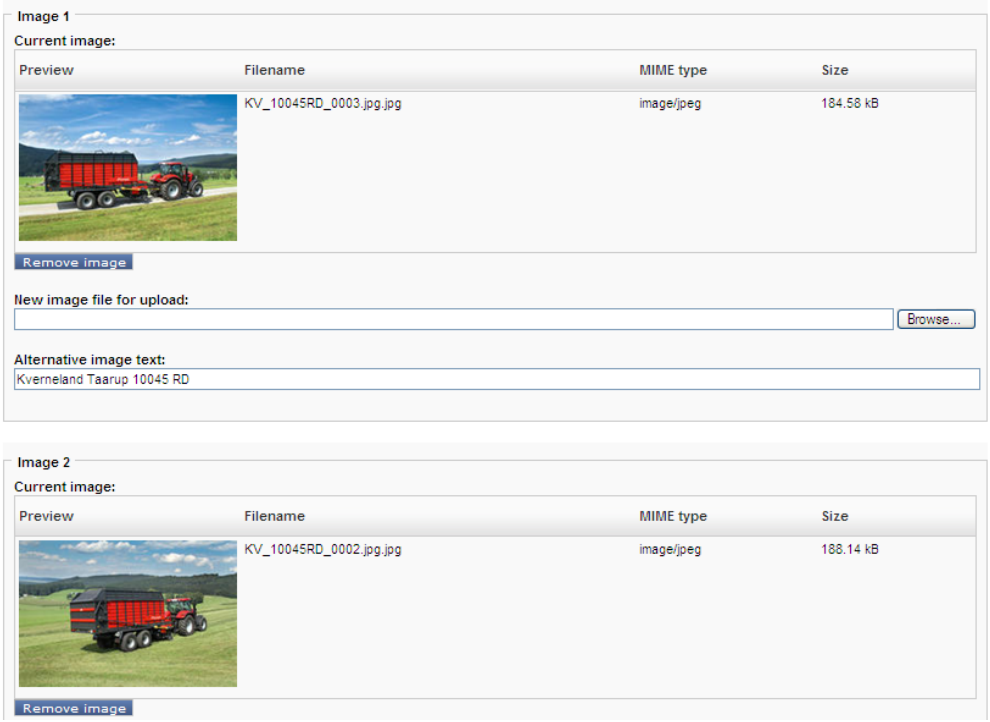
Technical Specifications

	Bale diameter	Intake System	Binding
RF 3120F	1.20 x 1.20m	Fork Feeder	Net or double binding

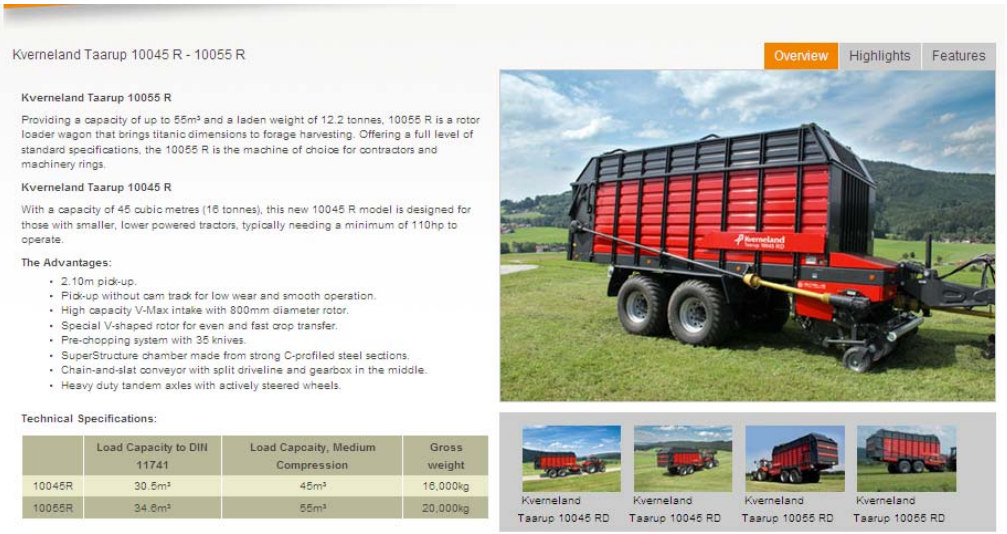
- Here is how the table looks on the web site:

- The formatting is the same for all tables. You can not change alignment or colors without changing all “comparison table’s”…

- Under image 1-4 you must add the 4 pictures for the image carousel. Format of the image must be 500x340 pixel (make sure you save the image in a web format). It is also possible to add an alternative image text. It is recommended to keep these very short, max two lines.



- The published result.



Kverneland Taarup 10045 R - 10055 R
Overview
Highlights
Features
Kverneland Taarup 10055 R
Providing a capacity of up to 55m³ and a laden weight of 12.2 tonnes, 10055 R is a rotor loader wagon that brings titanic dimensions to forage harvesting. Offering a full level of standard specifications, the 10055 R is the machine of choice for contractors and machinery rings.
Kverneland Taarup 10045 R
With a capacity of 45 cubic metres (16 tonnes), this new 10045 R model is designed for those with smaller, lower powered tractors, typically needing a minimum of 110hp to operate.
The Advantages:
2.10m pick-up.
Pick-up without cam track for low wear and smooth operation.

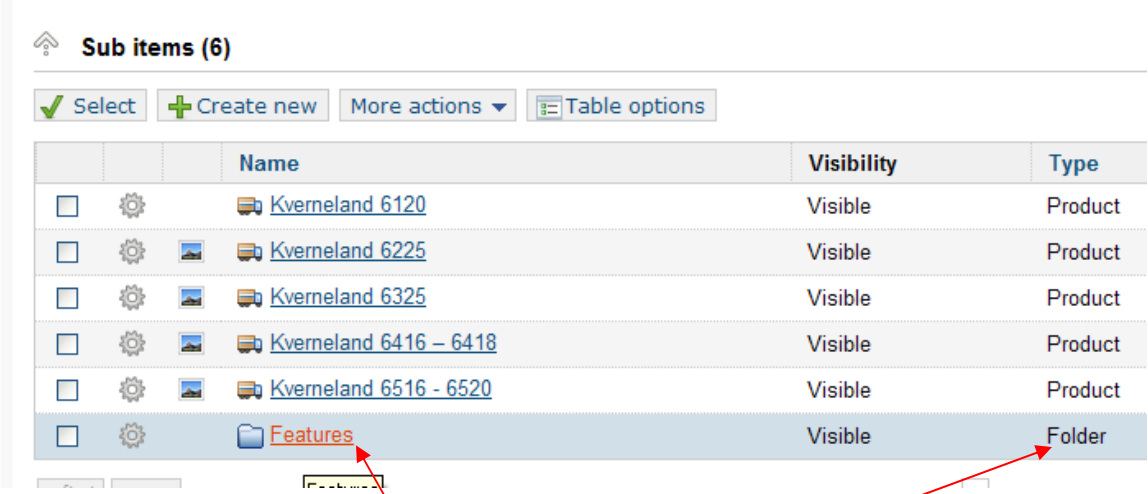
Features and Highlights for products on brand site

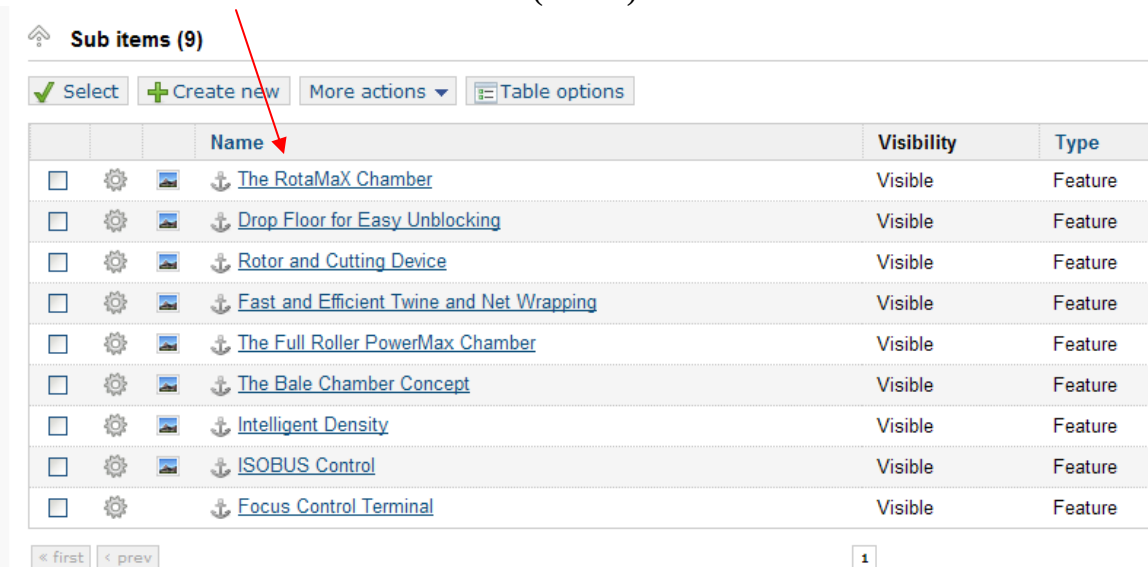
Work with this from the admin area: http://admin.kvernelandgroup.com

Features

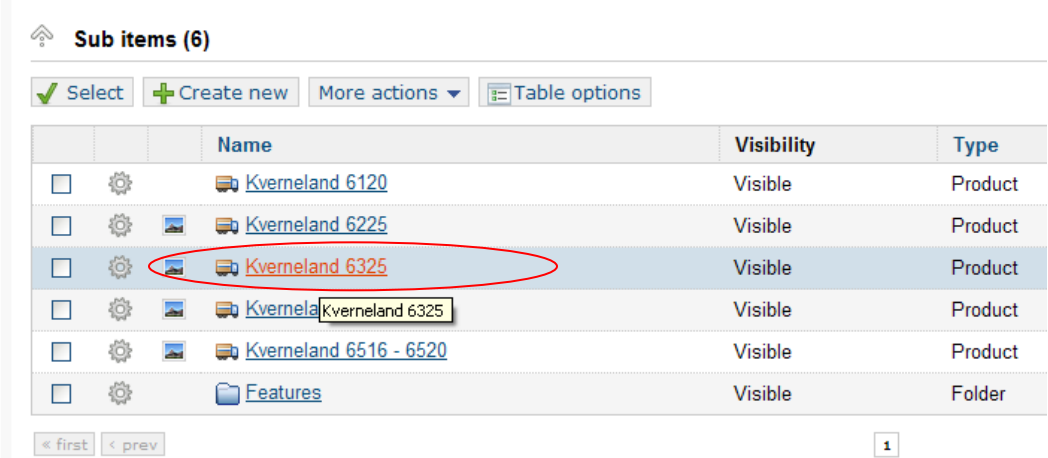
All the Features are stored in a folder connected to the machines. In the Features Folder for the Round Balers, there are 9 Features.



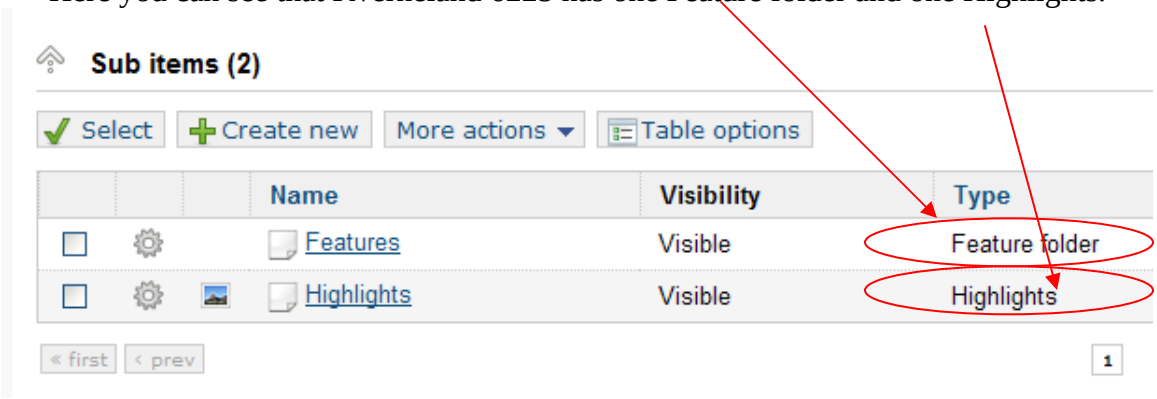
- Click on the Feature you are going to translate and click on Edit. Same procedure for translation as for other “articles”.
- Here are the 9 Feature in the Features (Folder):



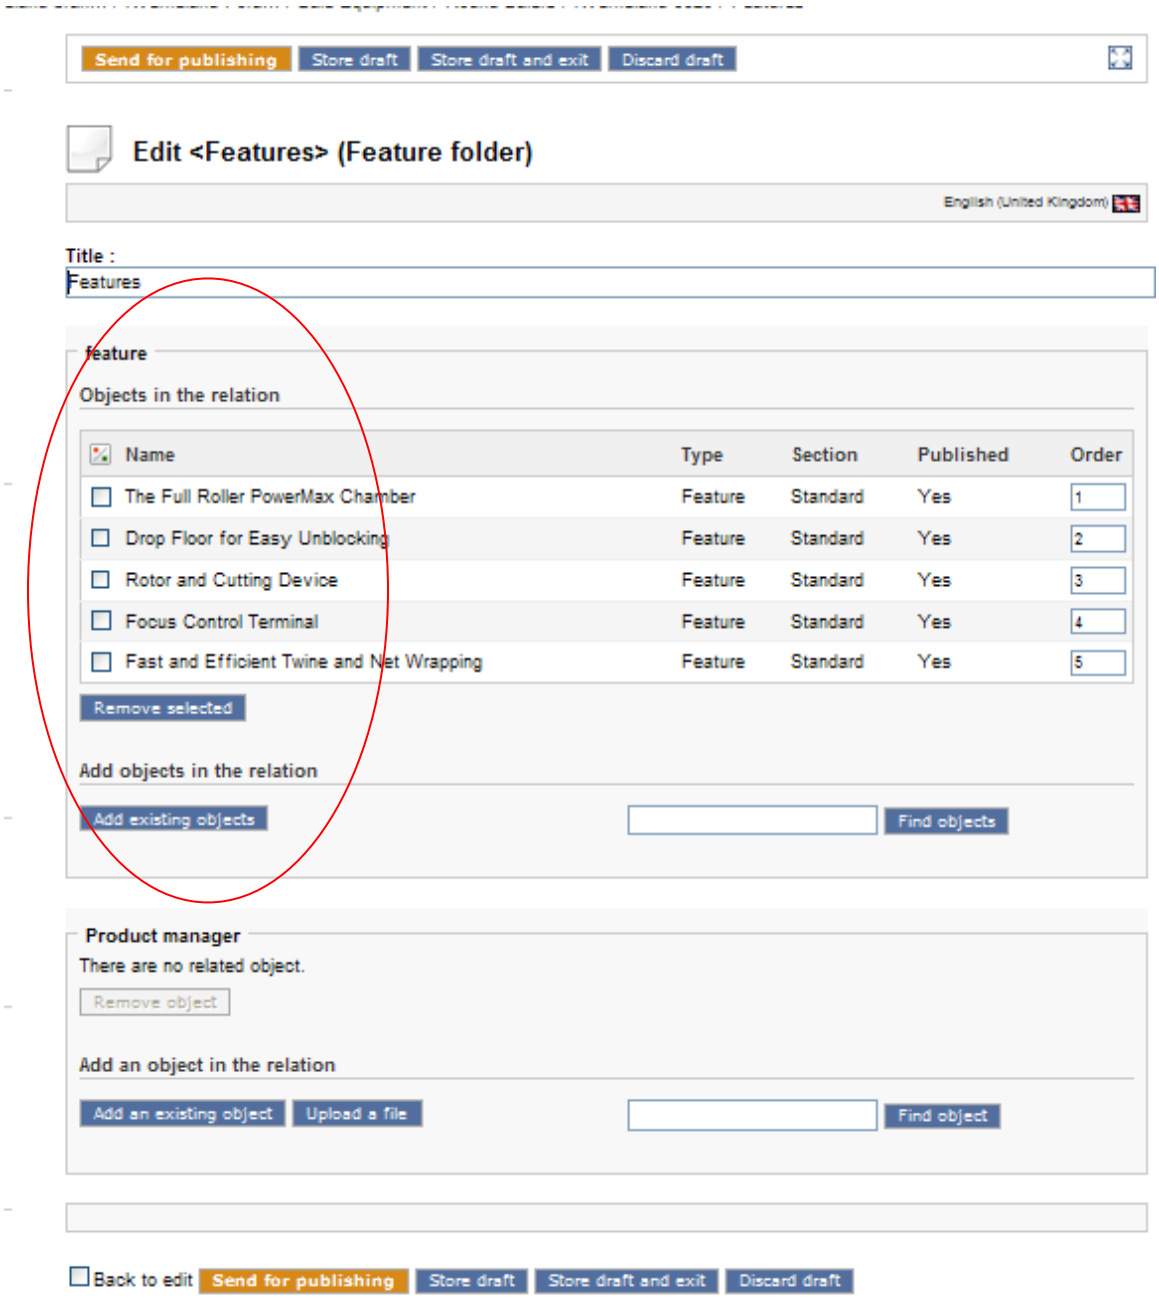
- Next step is to go to the Product. Click on the product so you can see the items connected to that product.



- Here you can see that Kverneland 6225 has one Feature folder and one Highlights.



- Click on Features and Edit this. These object are linked to the Features on your site

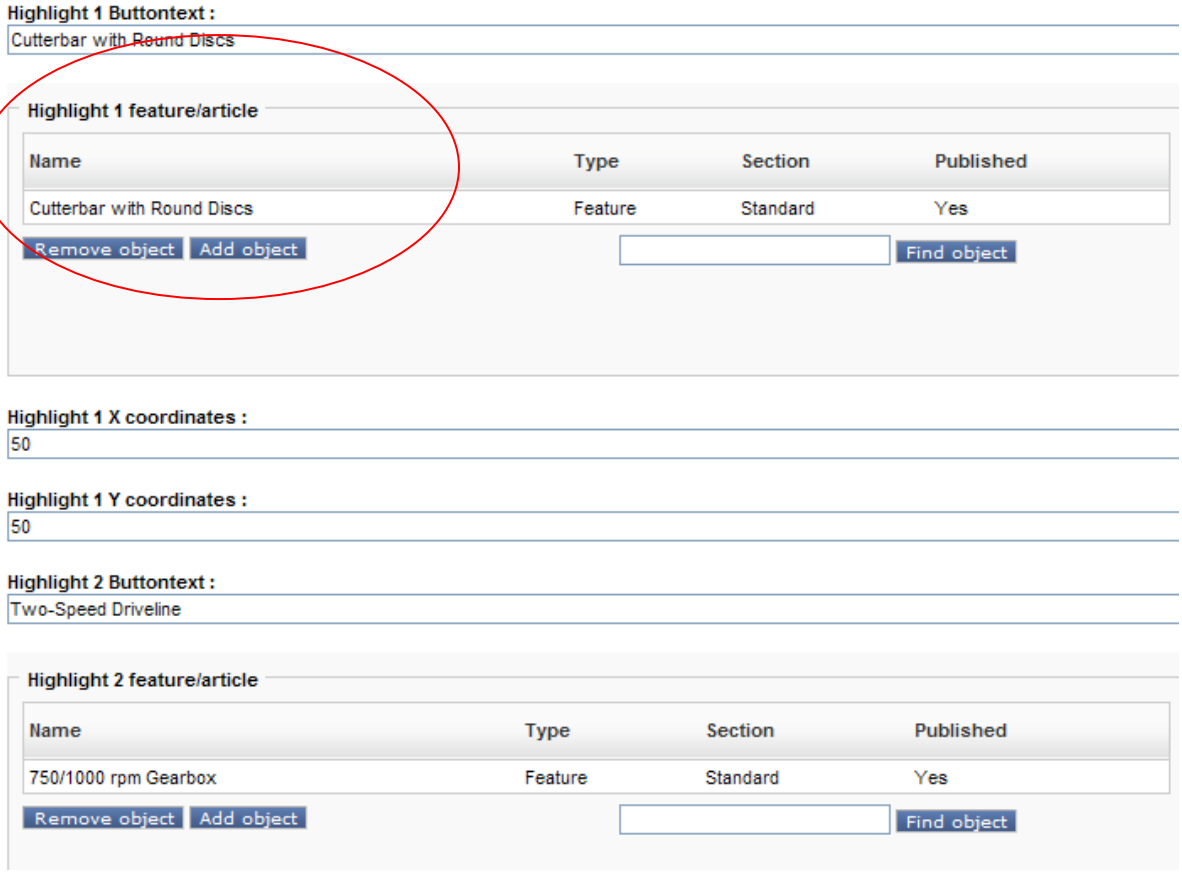


- Normally the objects added in this form are linked to your site, but sometimes (if the text do not show properly), you need to remove some of the objects and “Add existing objects”. Browse to your site and select the correct Feature.

Highlights

- When the Features are translated, you will see that in the Highligts most often still have the English Feature connected. Change the link in the Highlight (for the Product) to the Feature on your site.

- In this Highlight, the link to the Feature connected must be changed (Highlight 1 feature/article). Remove the Feature and click on “Add object”. Browse to your site and the Feature for the product. Choose the Feature and click on “Select”. Do the same in the boxes for the other “Highlight X feature/article”.



Browse

To select objects, choose the appropriate radio button or checkbox(es), then click the "Select" button.

To select an object that is a child of one of the displayed objects, click the object name for a list of the children of the object.

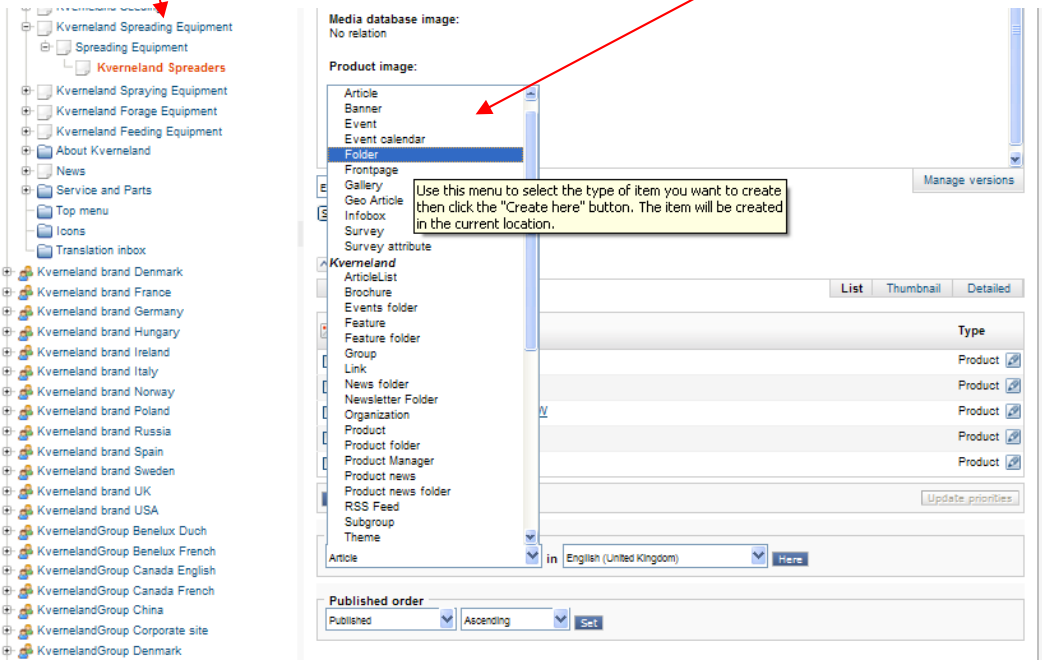
How to make new Features

The Features have to be made in a special way. You have to work from the admin area for making those folders and Features. http://admin.kvernelandgroup.com/

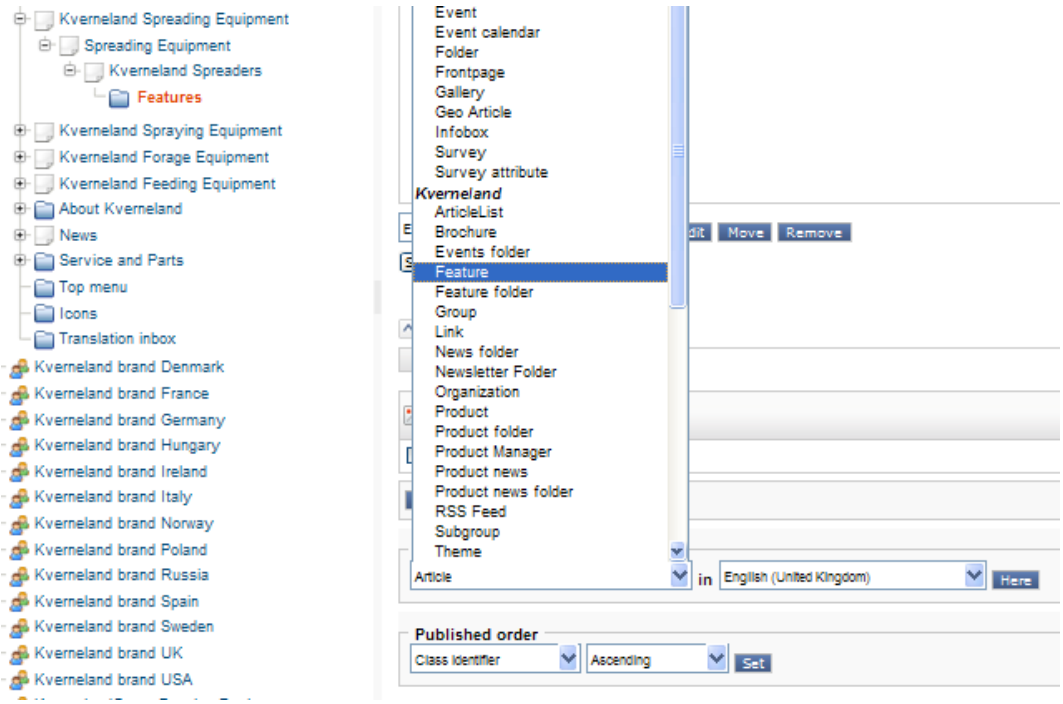
New Features

For each category of products, you make one normal Folder and fill it with all Features for products in this category. Then you make a Feature Folder under each Product and connect only to the Features for that product. Detailed description follows:

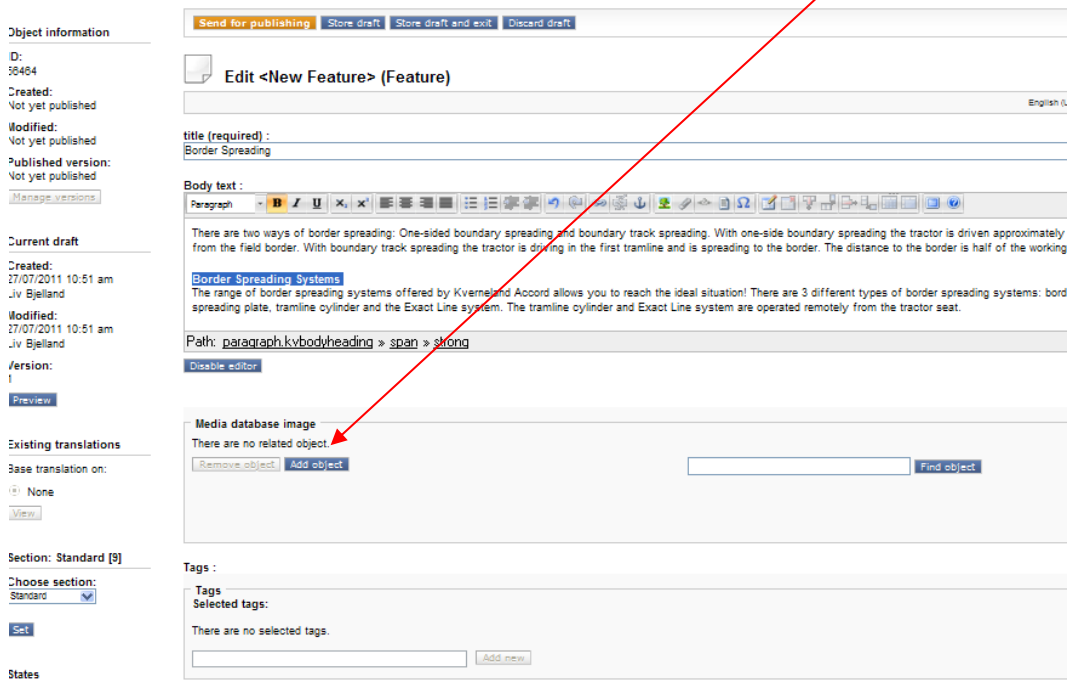
- In the product folder for the products you have to make an ordinary Folder and call it Features. This folder will not show on the web site, therefore you have to work in admin



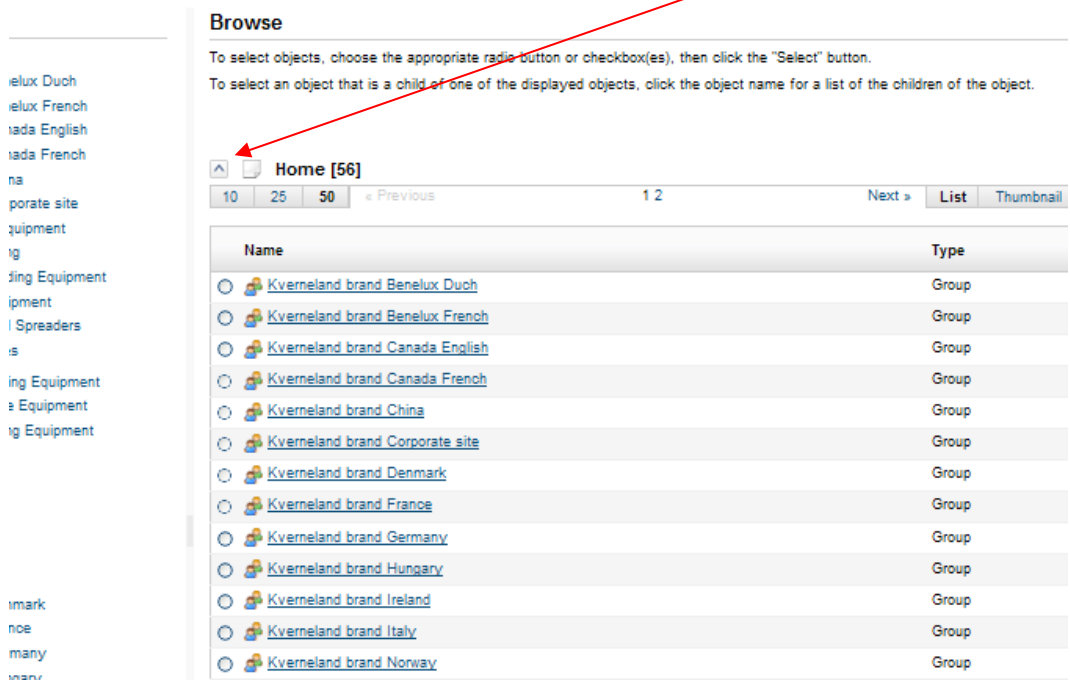
- In this folder you have to make a “Feature”.



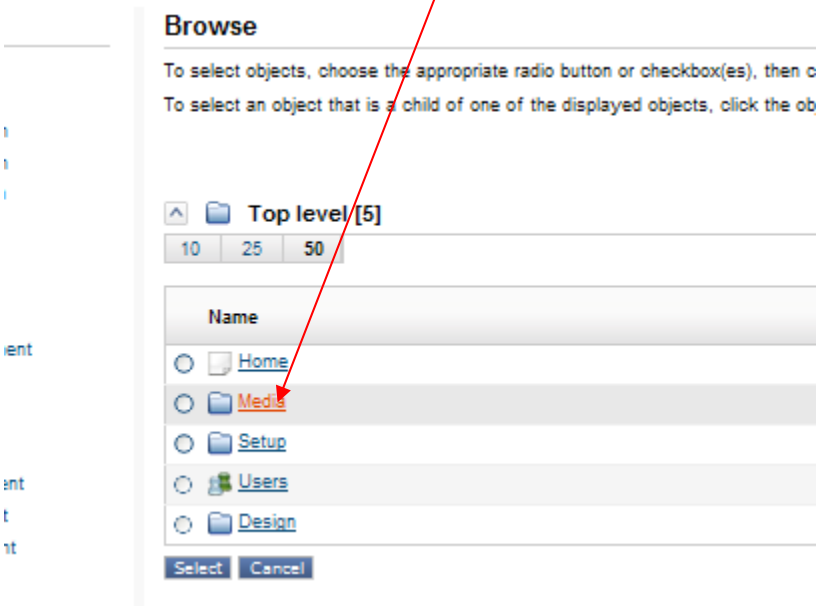
- Fill in the “title” and text in the “Body text”. To add a picture you have to click on “Add object” in the box “Media database image”. When you click on that button, you have to navigate to the correct folder. Beneath here there are several screen dumps showing how:



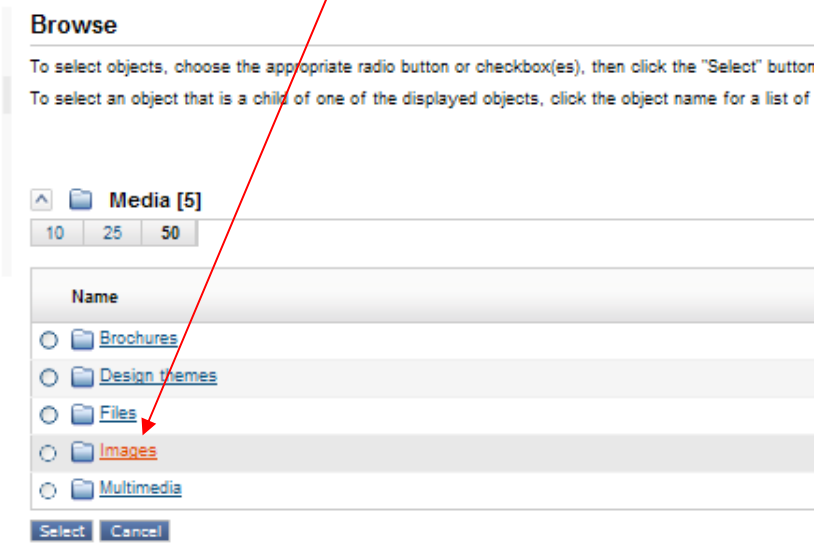
- When you click on “Add object”, this window will show. Now you have to navigate by clicking in different places. First of all, click on this small arrow



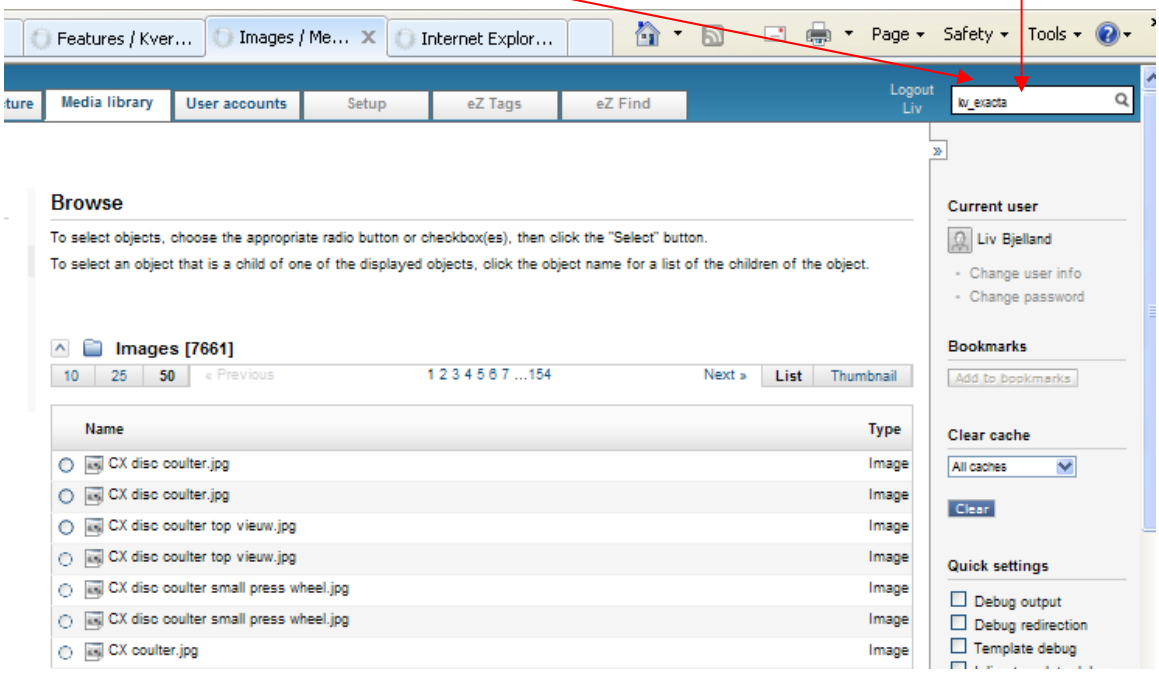
- New window, click on the word “Media”



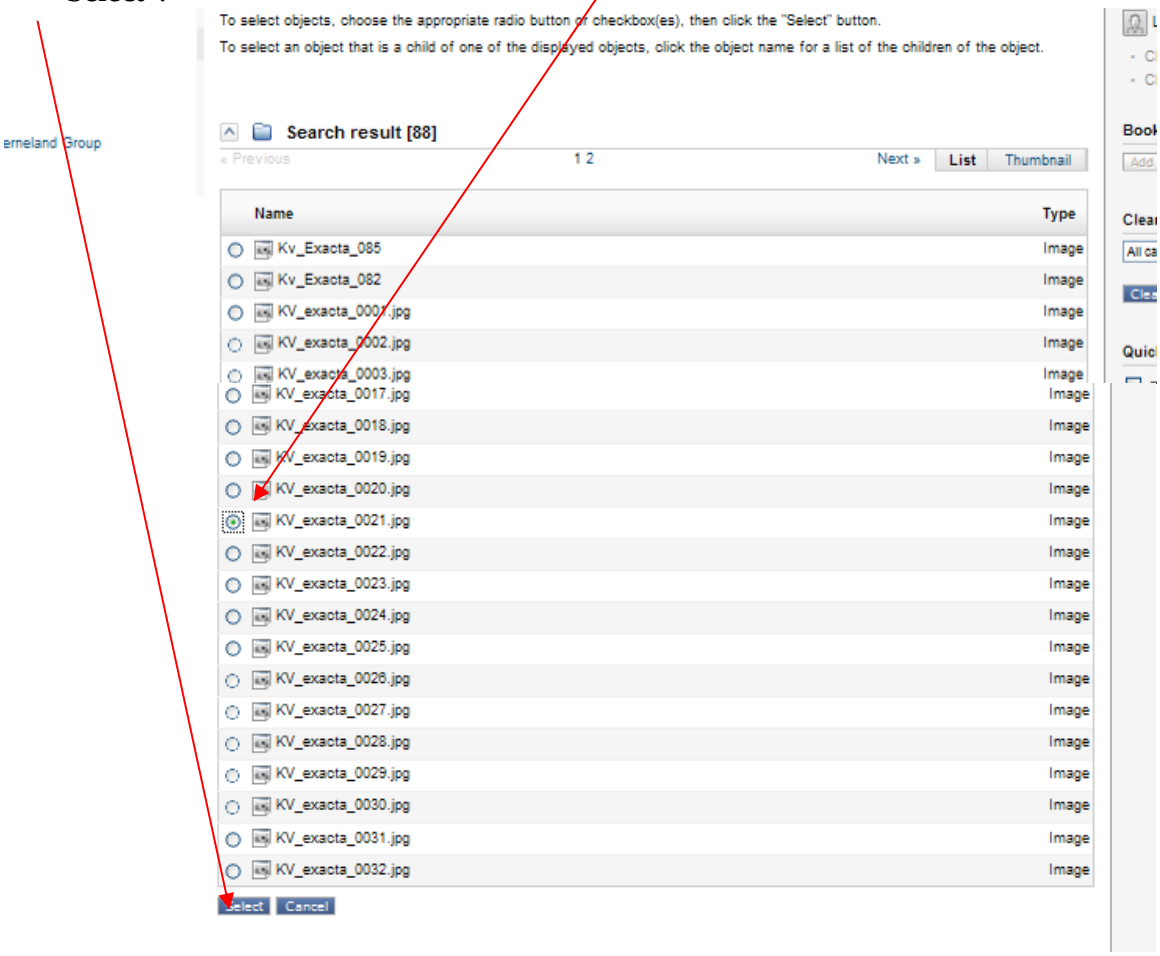
- Next window, click on “Images”



- Here is the window where you choose the picture. If you know some of the name of the picture (you can find the picture you want in Download Centre, copy the file name and paste it into the search box) you can write the name in the search box. Write the name and **press Enter**.



- Here is the result for my search. Click in the circle in front of the picture and click “Select”.



- Now you are back to the Feature and the picture is added.

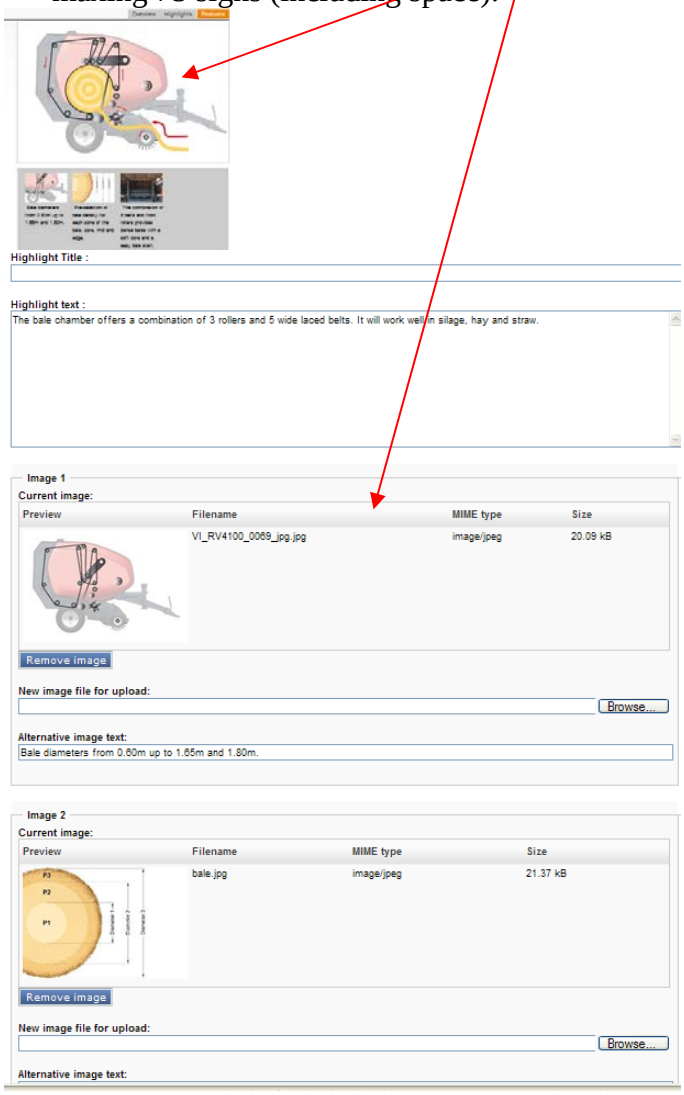
- Add the highlight text. This will be shown when the feature box opens under highlights (see illustration below).
- It is recommend to make the highlight text no longer than 100 signs (including space)

Tandem Axles
Loading and Unloading
Conveyor belt with 4 chains and split driveline designed for the heaviest loads
Details

- Add the text you want to show in the box for this Feature on the Highlights picture.
- Add images and text in the boxes “image 1, 2…”. These pictures have the size of 500x340 pixels.
- You can add 4 pictures like this, and they will show here.

- When adding the alternative image text is recommend keeping this at 50 signs and maxing 75 signs (including space).

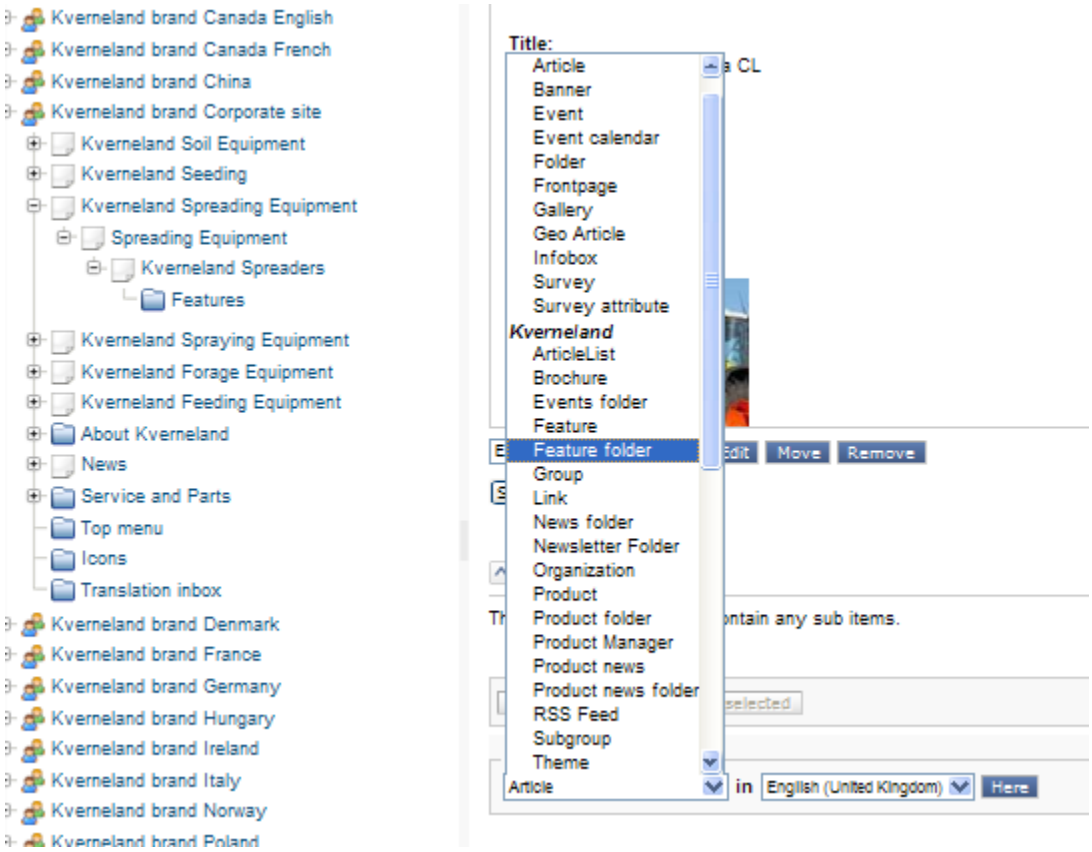


Click “Send for publishing”.

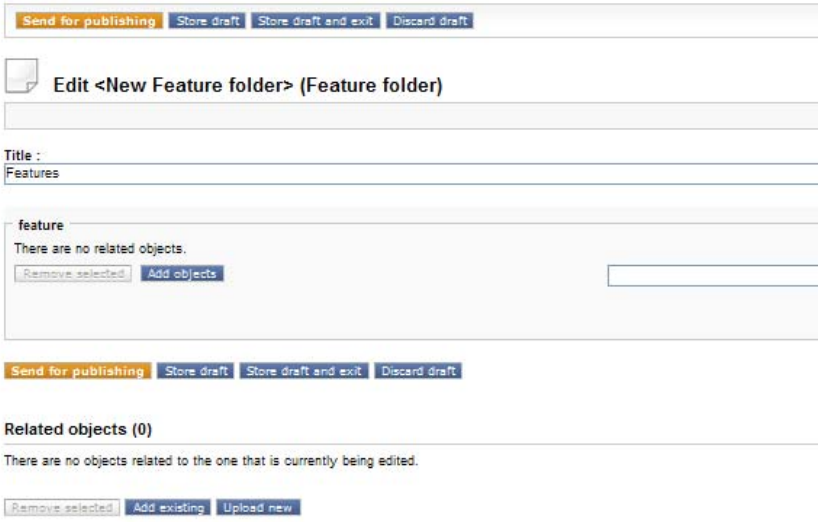
Next step is how to:

Add Feature to a product

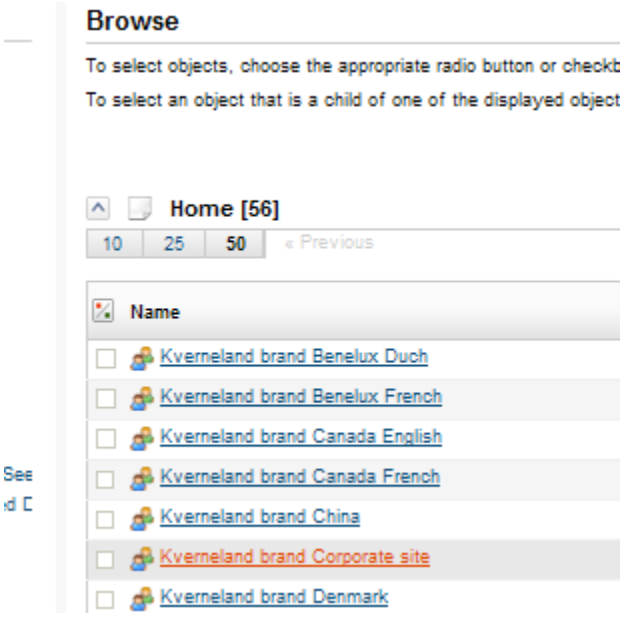
- Find the product (I selected the product Exacta CL). Choose to make a “Feature folder”.



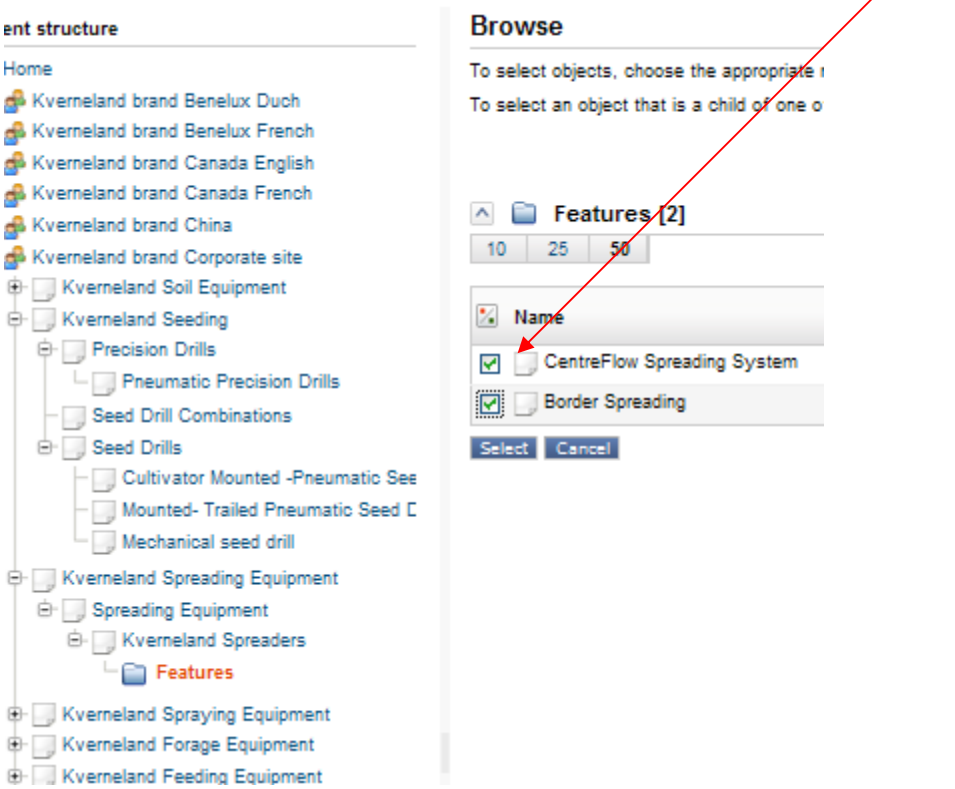
- New window: Put a name in “Title” area and click on “Add objects”



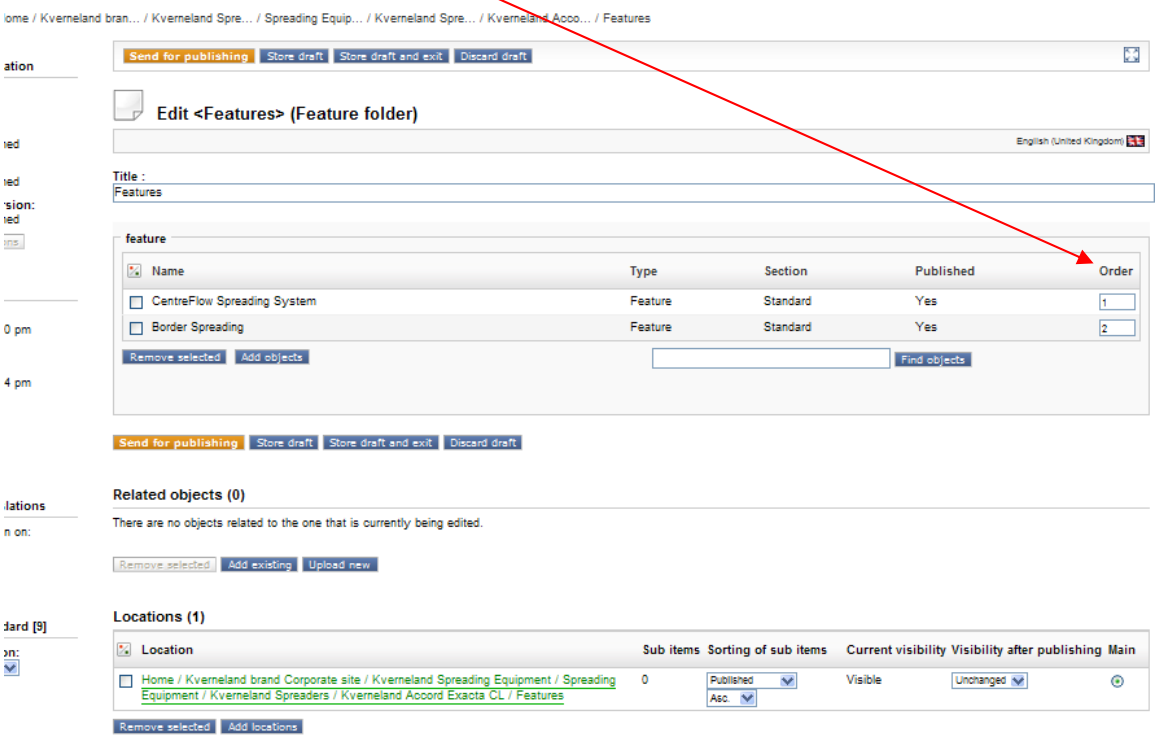
- Navigate to the correct Features by clicking on the text until you find the correct place



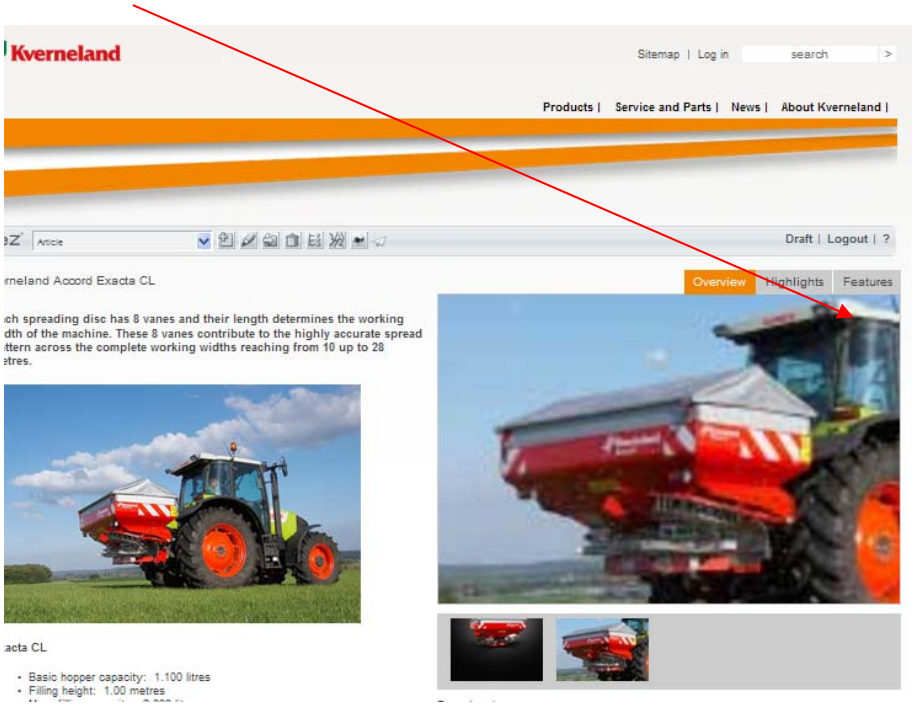
- For this case it is navigated to Kverneland spreaders and Features. Choose the Features for the product by marking the check box and click “Select”



- Now you can see the links to Features for this product. Do you want to add other Features to this product just edit the “Feature folder” and click on “Add objects”. You can also choose the Order of the Features here.

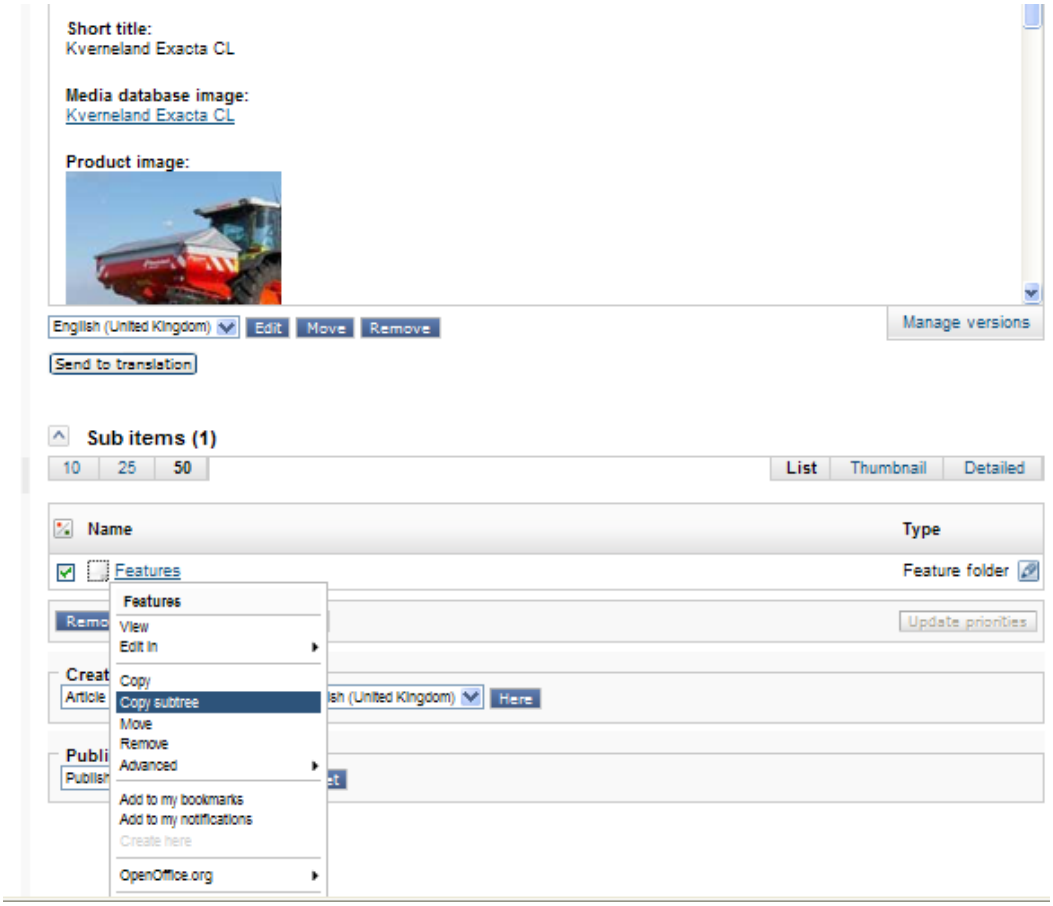


- For a final check, go to the web site and find you product and click on “Features”.

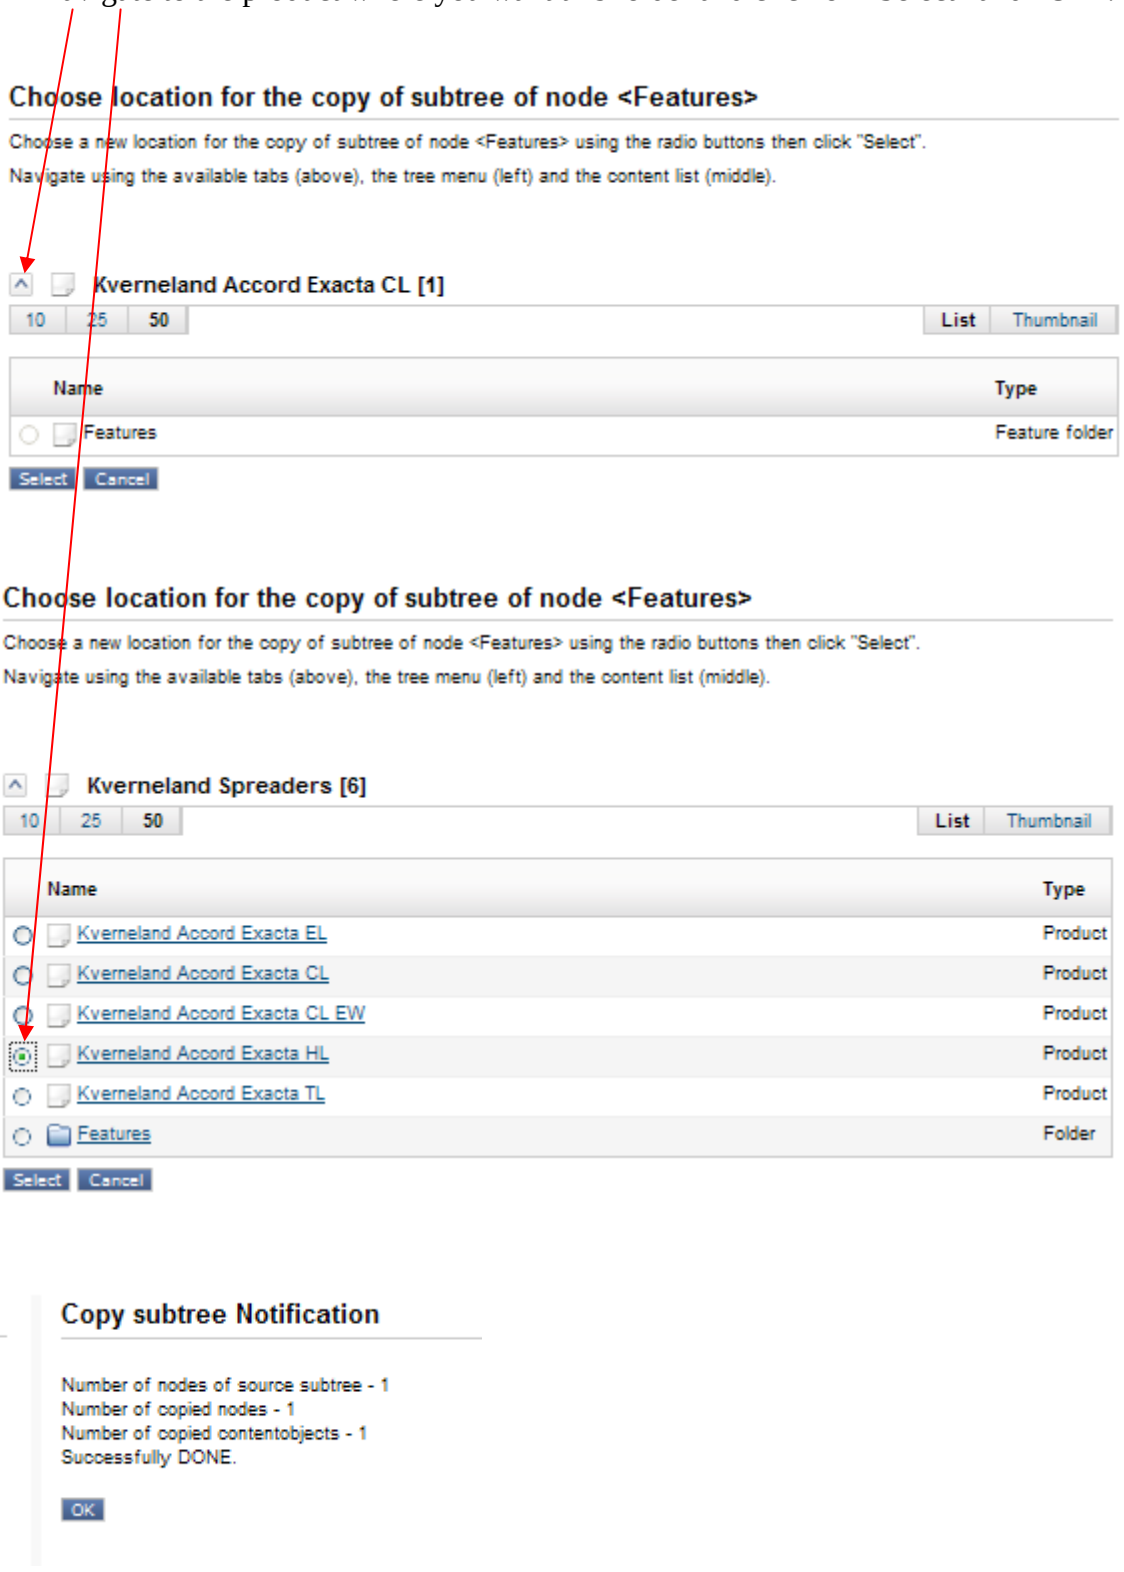


Copy Features to other Products

- If these Features are going to be for other products as well, you can copy the “Feature folder” to the other products. Here is how you do that: Mark the square in front of the “Feature folder”. Click in the square in front of the name with your left mouse button and click on “Copy Subtree”



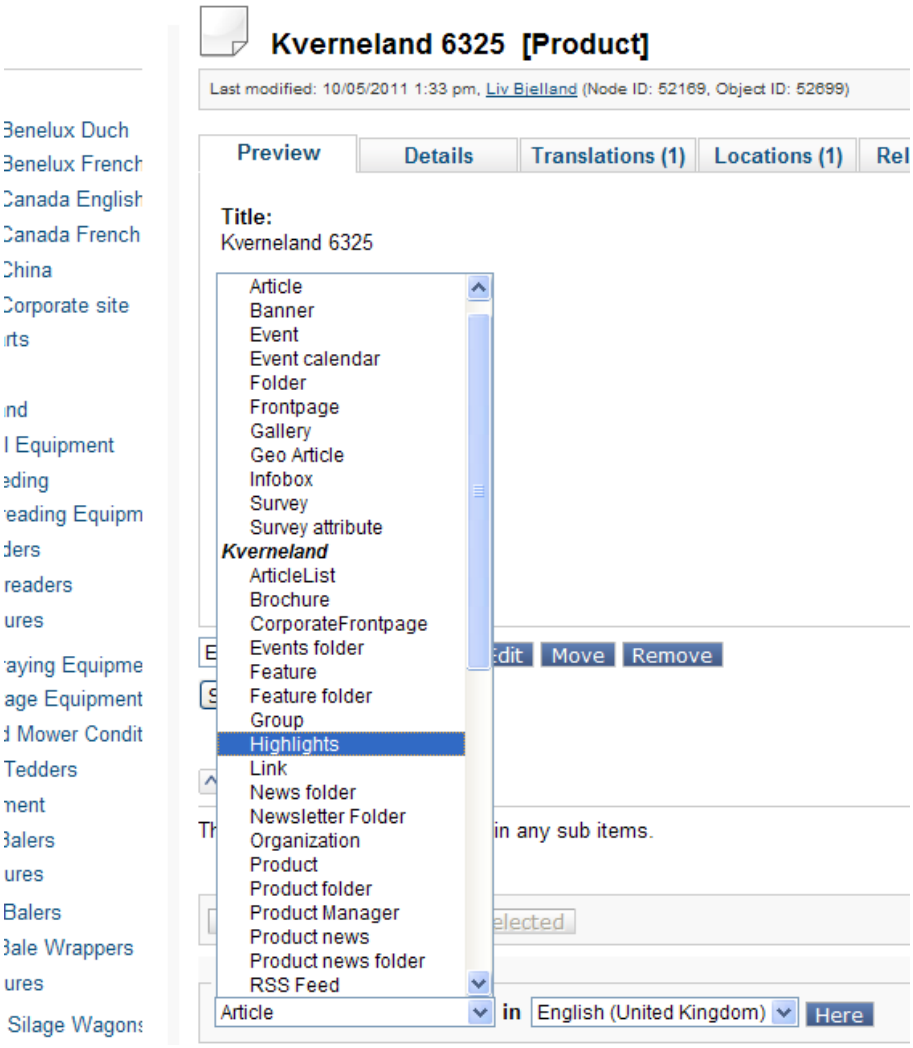
- Navigate to the product where you want this folder and click on “Select” and “OK”.



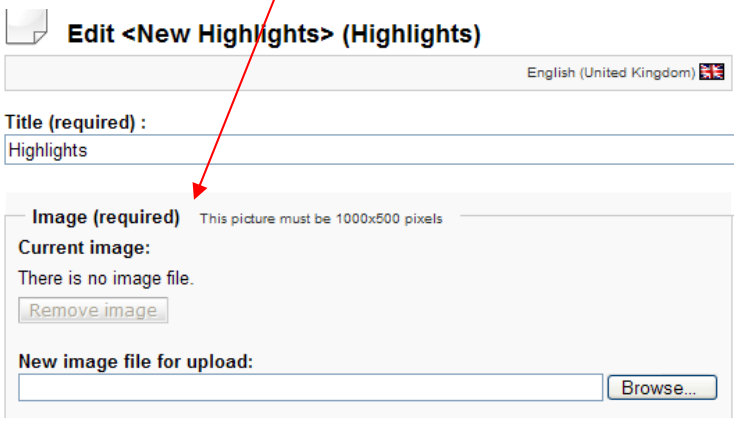
How to make Highlights to a product

Work from the admin area: http://admin.kvernelandgroup.com/

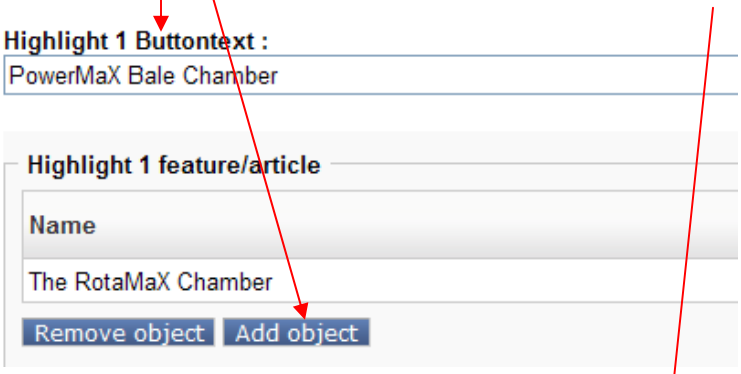
- Choose your product. Create Highlights and click “Here”.

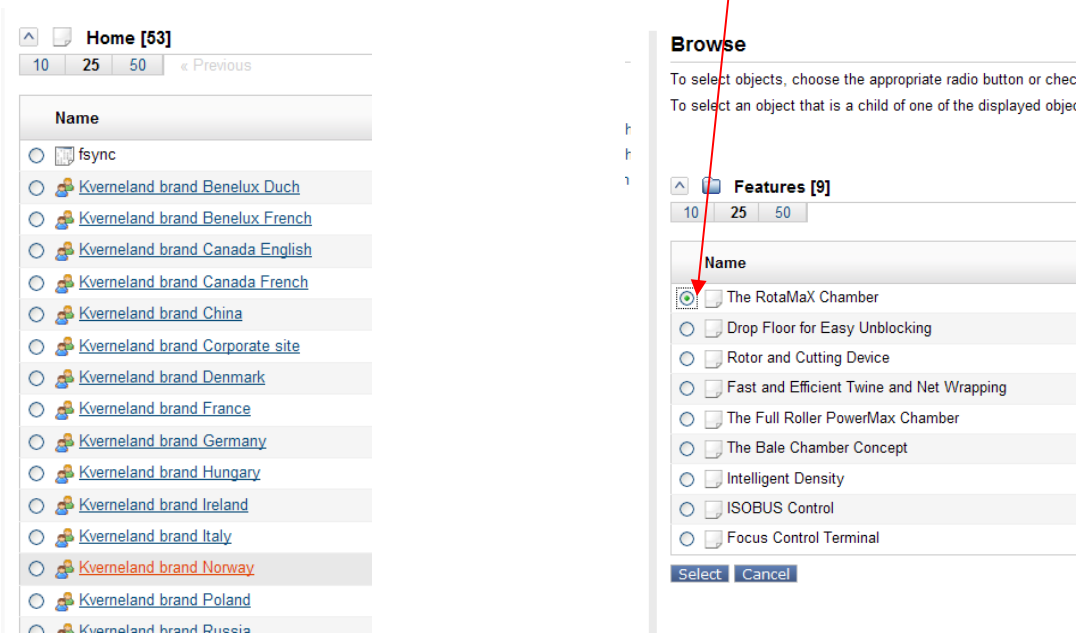


- Add a picture as the main picture. The correct size for the picture is 1000x500 pixels. Make sure you save the image in a web format

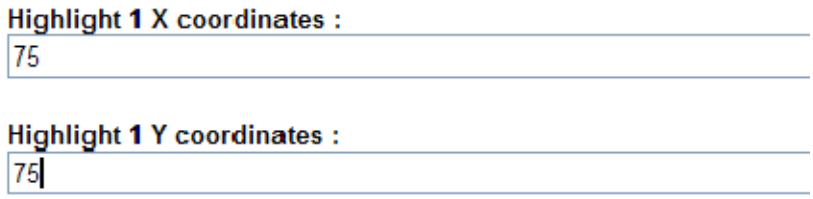


- Fill inn the Buttontext. Max 25 signs including space.
- Click on "Add object" and browse to the correct Feature article and click "Select"

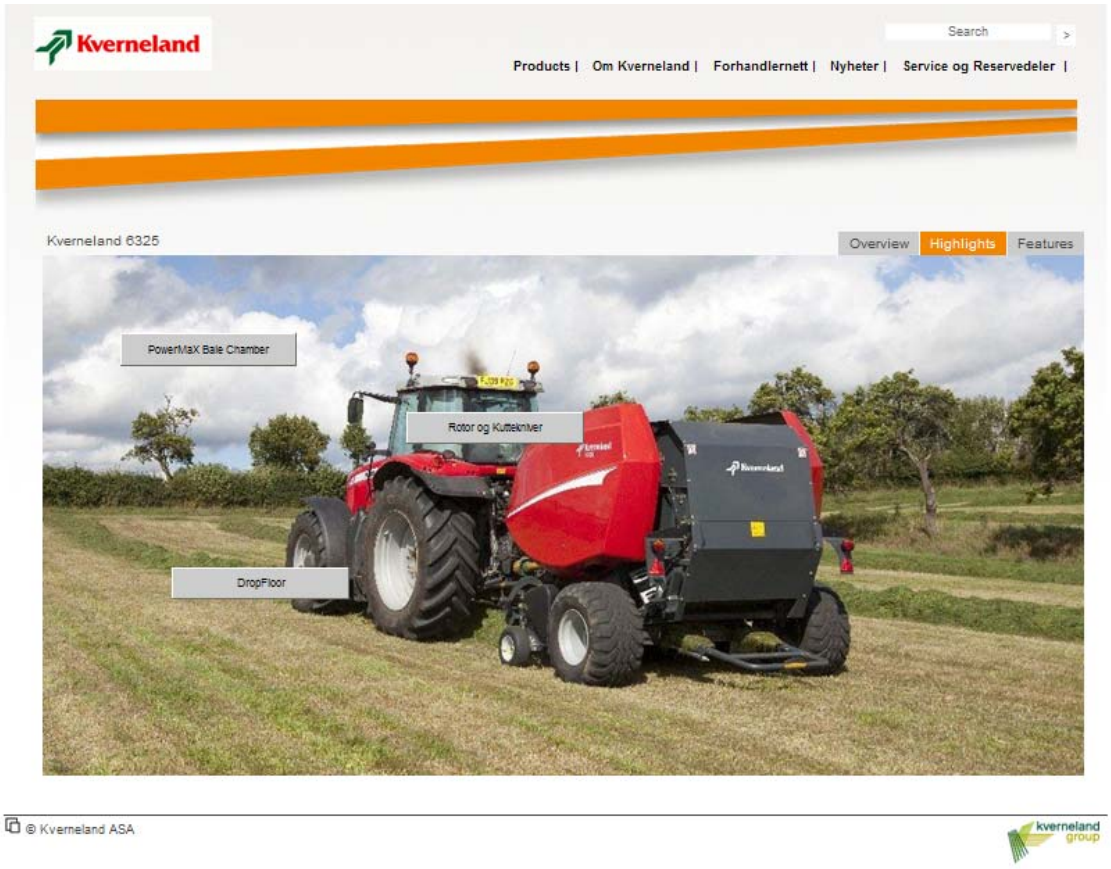




- Fill in the coordinates (where you want the button on the picture).
- Do the same for the other buttons. You can have totally 8 buttons on the image.



- Here is how this Highlights just made looks:



Download Centre

These tags are the choices you have in the Download Centre

Each image needs at least one of each tag for showing in Download Centre (minimum 6 tags).
